According to Statistics MRC, the Global Commercial Aircraft Lighting Market is accounted for \$1,557.24 million in 2015 and is expected to reach \$2,243.23 million by 2022 growing at a CAGR of 5.4% during the forecast period. Growing low cost carriers, rise in air voyage, growth of regional economies and emerging aircraft manufacturers are the major factors driving the market growth. On the other hand, Global economic ambiguity and capacity limits in supplier production are hindering the market. High Costs allied with LED Aircraft Lighting System Airlines are presently trying to gear increasing fuel prices, which poses a major challenge. Light weight products and LED technology provides plenty of opportunities for vendors in commercial aircraft lighting market.

A vast demand is anticipated for aircraft lights in the Asia-Pacific region, mainly due to rising deliveries of A350, A380, B787 Dreamliner, XWB and many other LED-integrated aircraft models.

Some of the key players in the market include Honeywell Aerospace, Cobham, B/E Aerospace, Ave

Engineering, UTC Aerospace Systems, Zodiac Aerospace, Bruce Aerospace, STG Aerospace, Diehl Aerosystems, Astronics, Emteq Inc., Luminator Aerospace and Goodrich Corporation.
