## Abstracts

According to Statistics MRC, the Global Compostable Foodservice Packaging Market is accounted for \$16.70 million in 2018 and is expected to reach \$30.96 million by 2027 growing at a CAGR of 7.1% during the forecast period. Some of the key factors influencing the market growth include rising awareness regarding the ill-effects of single-use plastics and various materials on the environment and surging adoption of foodservice disposables. However, high price of compostable materials for packaging is restraining the market growth.

Compostable foodservice packaging was identified as a feasible solution. With 'sustainability' and 'zero-waste' gaining traction, compostable items made of plant-based material that can decompose along with food waste, and turn into compost continue to gain the attention of foodservice industry. Compostable packaging does not require petroleum during production, as it is made completely from organic matter and has no plastic in it.

Based on the material type, Poly Lactic Acid (PLA) is a non-toxic, compostable bio based material derived from starch and/or sugar and has high mechanical strength and plasticity. It is accepted as GRAS (Generally Recognized as Safe) by the Food and Drug Administration (FDA) and suitable for using in food and beverage packaging. PLA is primarily obtained from lactic acid which can be produced from renewable substances such as potato, wheat and corn starch. By Geography, Asia-Pacific is expected to grow at the significant rate over the forecast period owing to a large population as well rising awareness among the consumers.

Some of the key players in global Compostable Foodservice Packaging market are Cereplast Inc., Biosphere Industries LLC, Penley Corporation, Anchor Packaging, Eco

Products Inc., Genpak, BioBag Canada Inc., International Paper Company, The Waddington Group, Dart Container, Good Start Packaging, Be Green Packaging, Eco-Packaging and Huhtamaki.

### What our report offers:

Market share assessments for the regional and country level segments

Market share analysis of the top industry players

Strategic recommendations for the new entrants

Market forecasts for a minimum of 9 years of all the mentioned segments, sub segments and the regional markets

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

### Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

#### Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

#### Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the clients interest (Note: Depends of feasibility check)

## Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances
