According to Stratistics MRC, the Global Connected Aircraft Market is accounted for \$5.29 billion in 2020 and is expected to reach \$20.56 billion by 2028 growing at a CAGR of 18.5% during the forecast period. Increasing aircraft deliveries and the growing need for airline & passenger safety are the major factors propelling the market growth. However, cybersecurity issues are hampering market growth.

Connected aircraft systems supply in-flight entertainment to air passengers with the provision of high-quality audio, flight details, music, games, radio, and news. They also help in providing flight safety instructions in regional languages.

Based on the connectivity, the in-flight connectivity segment is estimated to have a lucrative growth during the forecast period due to the rising demand for passenger connectivity and in-flight entertainment. Advancements in In-flight connectivity offer multiple facilities such as broadband Wi-Fi service and entertainment services.

By geography, the Asia Pacific is going to have a huge demand due to the increasing demand for air travel in the region. Furthermore, the increasing air passenger demand for in-flight internet connectivity owing to the emergence of portable entertainment devices is anticipated to boost the regional market growth.

Some of the key players profiled in the Connected Aircraft Market include BAE Systems, Collins Aerospace, Digecor, Global Eagle Entertainment, Gogo, Honeywell International, Inmarsat, Kontron, Panasonic Avionics, Thales Group, Viasat, Zodiac Aerospace, Rockwell Collins, Cobham., SITA, and Burrana Inc.
