Abstracts

According to Statistics MRC, the Global Connected Mobility Platform Market is accounted for \$33.1 billion in 2026 and is expected to reach \$87.4 billion by 2034 growing at a CAGR of 12.9% during the forecast period. Connected mobility platforms integrate digital solutions that link vehicles, infrastructure, and users to enable seamless transportation services, real-time data exchange, and intelligent route management. These platforms power everything from ride-hailing applications to fleet telematics and electric vehicle charging networks. As urbanization accelerates and consumers shift away from private car ownership toward shared, on-demand mobility, connected platforms are becoming the digital backbone of modern transportation ecosystems, facilitating efficient movement of people and goods across cities worldwide.

Market Dynamics:

Driver:

Rapid urbanization and increasing traffic congestion

Expanding city populations and growing vehicle density are creating urgent demand for intelligent mobility solutions that optimize transportation efficiency. Connected mobility platforms enable real-time traffic monitoring, dynamic route adjustments, and multimodal journey planning, directly reducing congestion-related delays and emissions. Municipal authorities are increasingly adopting these platforms as part of smart city initiatives, while commuters use them to navigate crowded urban environments. The economic cost of traffic congestion, estimated at hundreds of billions annually in lost productivity and fuel waste, provides strong financial justification for widespread platform deployment across both public and private transportation networks.

Restraint:

Data privacy and cybersecurity vulnerabilities

The extensive collection of user location, payment, and behavioral data across connected mobility platforms raises significant security and privacy concerns that slow adoption. High-profile data breaches in ride-hailing and fleet management systems have eroded consumer trust, prompting regulatory scrutiny and compliance costs. Cyberattacks targeting platform infrastructure could disrupt transportation networks, manipulate route data, or expose sensitive personal information. Meeting diverse regional data protection regulations, such as GDPR in Europe and varying state laws in North America, creates operational complexity. These challenges require continuous investment in encryption, access controls, and transparent data governance frameworks to maintain user confidence.

Opportunity:

Integration of AI-driven predictive analytics

Advanced artificial intelligence capabilities are unlocking new value from the vast operational data generated by connected mobility platforms. Predictive algorithms can forecast demand surges for ride-hailing services, anticipate vehicle maintenance needs before failures occur, and optimize fleet repositioning to minimize wait times. Machine learning models improve route accuracy based on historical traffic patterns and real-time conditions, while natural language processing enables voice-activated platform interactions. These AI enhancements reduce operational costs for fleet operators, improve user satisfaction through shorter wait times, and enable dynamic pricing models that balance supply and demand. The resulting efficiency gains drive platform

adoption across previously underserved market segments.

Threat:

Fragmented infrastructure and interoperability issues

The proliferation of competing mobility platforms with incompatible data standards threatens to create disconnected transportation silos rather than seamless integrated networks. Different cities operate distinct parking payment systems, transit authorities use proprietary scheduling software, and ride-hailing platforms maintain closed data ecosystems. Without industry-wide interoperability standards, users must navigate multiple applications for single journeys, defeating the promise of unified mobility-as-a-service. Platform providers face escalating development costs to maintain integrations with diverse third-party systems. Regulatory efforts to mandate open data sharing could disrupt established business models, while slow standardization progress delays the realization of truly connected mobility ecosystems.

Covid-19 Impact:

The pandemic initially devastated shared mobility demand as lockdowns and health concerns emptied public transit and ride-hailing vehicles. Platform operators saw revenue declines exceeding 60% in early 2020, forcing layoffs and service reductions. However, the crisis accelerated digital transformation, with contactless payment integration and real-time occupancy tracking becoming essential features. Micro-mobility platforms for bicycles and scooters surged as people avoided crowded buses and trains. The recovery period revealed lasting behavioral shifts, with suburban and off-peak travel patterns requiring more flexible fleet management capabilities. Overall, COVID-19 compressed years of platform innovation into months, leaving the market more resilient and technologically advanced.

The Fleet management platforms segment is expected to be the largest during the forecast period

The Fleet management platforms segment is expected to account for the largest market share during the forecast period, driven by the critical need for commercial vehicle operators to monitor performance, reduce fuel costs, and ensure regulatory compliance. These platforms provide real-time vehicle tracking, driver behavior analytics, maintenance scheduling, and route optimization, delivering measurable return on investment for logistics companies, delivery services, and public transit authorities. The

explosive growth of e-commerce and last-mile delivery has expanded the addressable market beyond traditional trucking fleets to include courier networks and autonomous delivery vehicles. Established telematics infrastructure and proven operational benefits ensure fleet management platforms maintain market leadership.

The Cloud-based segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the Cloud-based segment is predicted to witness the highest growth rate, as mobility platform providers and their enterprise customers increasingly favor scalable, cost-effective software-as-a-service deployment models. Cloud solutions eliminate expensive on-premise hardware investments, enable automatic updates with the latest features and security patches, and support remote access from any connected device. The flexibility to scale processing capacity up or down based on fluctuating demand, such as peak holiday seasons for delivery fleets, provides significant operational advantages. Integration with cloud-based mapping services, payment gateways, and data analytics tools accelerates deployment timelines. As 5G networks expand globally, cloud platforms will further leverage low-latency connectivity for real-time mobility applications.

Region with largest share:

During the forecast period, the North America region is expected to hold the largest market share, underpinned by advanced telecommunications infrastructure, high vehicle connectivity penetration, and early adoption of shared mobility services. Major platform providers, including fleet management software companies and ride-hailing giants, are headquartered in the region, benefiting from robust venture capital funding and technology talent pools. The United States leads in telematics adoption for commercial fleets, driven by compliance mandates and competitive logistics markets. Consumer openness to app-based transportation, combined with extensive 4G/5G network coverage, enables seamless platform operation across urban and suburban areas. These factors solidify North America's dominant market position throughout the forecast period.

Region with highest CAGR:

Over the forecast period, the Asia Pacific region is anticipated to exhibit the highest CAGR, fueled by rapid urban population growth, expanding middle-class mobility needs, and aggressive smart city investments. China leads global adoption of shared mobility

platforms, with domestic giants serving billions of annual rides, while India and Southeast Asian markets experience explosive growth in ride-hailing and two-wheeler fleet management solutions. Government initiatives promoting electric vehicle adoption create demand for dedicated EV mobility platforms integrated with charging infrastructure. The region's high smartphone penetration and digital payment readiness remove adoption barriers. As megacities struggle with congestion and pollution, connected mobility platforms become essential policy tools, driving fastest growth globally.

Key players in the market

Some of the key players in Connected Mobility Platform Market include IBM Corporation, Microsoft Corporation, Google LLC, Amazon Web Services, Inc., Cisco Systems, Inc., Accenture plc, SAP SE, Oracle Corporation, Huawei Technologies Co., Ltd., Robert Bosch GmbH, Harman International Industries, Inc., PTC Inc., TomTom N.V., Airbiquity Inc., Geotab Inc., Samsara Inc., Verizon Communications Inc., AT&T Inc., Telefonaktiebolaget LM Ericsson, and Tata Consultancy Services Limited.

Key Developments:

In May 2026, Google expanded the global deployment footprints of its Android Automotive OS (AAOS), rolling out native, cloud-tethered navigation and real-time charging algorithms optimized for diverse global electric vehicle (EV) fleets.

In January 2026, Microsoft showcased its next-generation Azure Cloud integration for Software-Defined Vehicles (SDVs) at CES 2025, deploying lightweight Azure IoT Edge nodes designed to minimize latency for AI-assisted in-car companion engines and dynamic map updates.

In October 2025, IBM expanded its collaboration with leading global automotive suppliers to integrate IBM Maximo Asset Management and generative AI into connected manufacturing and fleet monitoring platforms, optimizing real-time predictive maintenance for multi-modal transit networks.

Platforms Types Covered:

Mobility-as-a-Service platforms

Fleet management platforms

Telematics platforms

Vehicle connectivity platforms

Ride-hailing and shared mobility platforms

EV mobility platforms

Parking and payment platforms

Navigation and route optimization platforms

Deployments Covered:

Cloud-based

On-premise

Hybrid

Applications Covered:

Fleet operations

Ride sharing

Car sharing

Subscription mobility

Navigation and routing

Remote vehicle management

Parking integration

EV charging integration

In-vehicle services

Data analytics and mobility insights

End Users Covered:

OEMs

Fleet operators

Mobility service providers

Public transport operators

Government and city authorities

Logistics companies

Regions Covered:

North America

United States

Canada

Mexico

Europe

United Kingdom

Germany

France

Italy

Spain

Netherlands

Belgium

Sweden

Switzerland

Poland

Rest of Europe

Asia Pacific

China

Japan

India

South Korea

Australia

Indonesia

Thailand

Malaysia

Singapore

Vietnam

Rest of Asia Pacific

South America

Brazil

Argentina

Colombia

Chile

Peru

Rest of South America

Rest of the World (RoW)

Middle East

Saudi Arabia

United Arab Emirates

Qatar

Israel

Rest of Middle East

Africa

South Africa

Egypt

Morocco

Rest of Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2023, 2024, 2025, 2026, 2027, 2028, 2030, 2032 and 2034
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

- 1.1 Market Snapshot and Key Highlights
- 1.2 Growth Drivers, Challenges, and Opportunities
- 1.3 Competitive Landscape Overview
- 1.4 Strategic Insights and Recommendations

2 RESEARCH FRAMEWORK

- 2.1 Study Objectives and Scope
- 2.2 Stakeholder Analysis
- 2.3 Research Assumptions and Limitations
- 2.4 Research Methodology
 - 2.4.1 Data Collection (Primary and Secondary)
 - 2.4.2 Data Modeling and Estimation Techniques
 - 2.4.3 Data Validation and Triangulation
 - 2.4.4 Analytical and Forecasting Approach

3 MARKET DYNAMICS AND TREND ANALYSIS

- 3.1 Market Definition and Structure
- 3.2 Key Market Drivers
- 3.3 Market Restraints and Challenges
- 3.4 Growth Opportunities and Investment Hotspots
- 3.5 Industry Threats and Risk Assessment
- 3.6 Technology and Innovation Landscape
- 3.7 Emerging and High-Growth Markets
- 3.8 Regulatory and Policy Environment
- 3.9 Impact of COVID-19 and Recovery Outlook

4 COMPETITIVE AND STRATEGIC ASSESSMENT

- 4.1 Porter's Five Forces Analysis
 - 4.1.1 Supplier Bargaining Power
 - 4.1.2 Buyer Bargaining Power
 - 4.1.3 Threat of Substitutes
 - 4.1.4 Threat of New Entrants

- 4.1.5 Competitive Rivalry
- 4.2 Market Share Analysis of Key Players
- 4.3 Product Benchmarking and Performance Comparison

5 GLOBAL CONNECTED MOBILITY PLATFORM MARKET, BY PLATFORM TYPE

- 5.1 Mobility-as-a-Service platforms
- 5.2 Fleet management platforms
- 5.3 Telematics platforms
- 5.4 Vehicle connectivity platforms
- 5.5 Ride-hailing and shared mobility platforms
- 5.6 EV mobility platforms
- 5.7 Parking and payment platforms
- 5.8 Navigation and route optimization platforms

6 GLOBAL CONNECTED MOBILITY PLATFORM MARKET, BY DEPLOYMENT

- 6.1 Cloud-based
- 6.2 On-premise
- 6.3 Hybrid

7 GLOBAL CONNECTED MOBILITY PLATFORM MARKET, BY APPLICATION

- 7.1 Fleet operations
- 7.2 Ride sharing
- 7.3 Car sharing
- 7.4 Subscription mobility
- 7.5 Navigation and routing
- 7.6 Remote vehicle management
- 7.7 Parking integration
- 7.8 EV charging integration
- 7.9 In-vehicle services
- 7.10 Data analytics and mobility insights

8 GLOBAL CONNECTED MOBILITY PLATFORM MARKET, BY END USER

- 8.1 OEMs
- 8.2 Fleet operators
- 8.3 Mobility service providers

- 8.4 Public transport operators
- 8.5 Government and city authorities
- 8.6 Logistics companies

9 GLOBAL CONNECTED MOBILITY PLATFORM MARKET, BY GEOGRAPHY

- 9.1 North America
 - 9.1.1 United States
 - 9.1.2 Canada
 - 9.1.3 Mexico
- 9.2 Europe
 - 9.2.1 United Kingdom
 - 9.2.2 Germany
 - 9.2.3 France
 - 9.2.4 Italy
 - 9.2.5 Spain
 - 9.2.6 Netherlands
 - 9.2.7 Belgium
 - 9.2.8 Sweden
 - 9.2.9 Switzerland
 - 9.2.10 Poland
 - 9.2.11 Rest of Europe
- 9.3 Asia Pacific
 - 9.3.1 China
 - 9.3.2 Japan
 - 9.3.3 India
 - 9.3.4 South Korea
 - 9.3.5 Australia
 - 9.3.6 Indonesia
 - 9.3.7 Thailand
 - 9.3.8 Malaysia
 - 9.3.9 Singapore
 - 9.3.10 Vietnam
 - 9.3.11 Rest of Asia Pacific
- 9.4 South America
 - 9.4.1 Brazil
 - 9.4.2 Argentina
 - 9.4.3 Colombia
 - 9.4.4 Chile

- 9.4.5 Peru
- 9.4.6 Rest of South America
- 9.5 Rest of the World (RoW)
 - 9.5.1 Middle East
 - 9.5.1.1 Saudi Arabia
 - 9.5.1.2 United Arab Emirates
 - 9.5.1.3 Qatar
 - 9.5.1.4 Israel
 - 9.5.1.5 Rest of Middle East
 - 9.5.2 Africa
 - 9.5.2.1 South Africa
 - 9.5.2.2 Egypt
 - 9.5.2.3 Morocco
 - 9.5.2.4 Rest of Africa

10 STRATEGIC MARKET INTELLIGENCE

- 10.1 Industry Value Network and Supply Chain Assessment
- 10.2 White-Space and Opportunity Mapping
- 10.3 Product Evolution and Market Life Cycle Analysis
- 10.4 Channel, Distributor, and Go-to-Market Assessment

11 INDUSTRY DEVELOPMENTS AND STRATEGIC INITIATIVES

- 11.1 Mergers and Acquisitions
- 11.2 Partnerships, Alliances, and Joint Ventures
- 11.3 New Product Launches and Certifications
- 11.4 Capacity Expansion and Investments
- 11.5 Other Strategic Initiatives

12 COMPANY PROFILES

- 12.1 IBM Corporation
- 12.2 Microsoft Corporation
- 12.3 Google LLC
- 12.4 Amazon Web Services, Inc.
- 12.5 Cisco Systems, Inc.
- 12.6 Accenture plc
- 12.7 SAP SE

- 12.8 Oracle Corporation
- 12.9 Huawei Technologies Co., Ltd.
- 12.10 Robert Bosch GmbH
- 12.11 Harman International Industries, Inc.
- 12.12 PTC Inc.
- 12.13 TomTom N.V.
- 12.14 Airbiquity Inc.
- 12.15 Geotab Inc.
- 12.16 Samsara Inc.
- 12.17 Verizon Communications Inc.
- 12.18 AT&T Inc.
- 12.19 Telefonaktiebolaget LM Ericsson
- 12.20 Tata Consultancy Services Limited
