According to Statistics MRC, the Global Continuous Cardiac Monitoring Devices market is expected to grow from \$XX million in 2016 to reach \$XX million by 2022 with a CAGR of XX%. Growing prevalence of cardiovascular diseases, recent technological developments, and growing investments in research & development activities are the factors propelling the market growth. In addition, favorable government regulations, increasing health care awareness are boosting the market. However, high costs for devices, lack of standard healthcare policies are restraining the market growth.

By product type, ECG Devices segment is expected to be a fastest growing segment during the forecast period. This growth is owed to increasing cardiac disease coupled with geriatric population. North American market is estimated to be the dominant region attributed to its huge patient base and healthcare sector. Asia Pacific is accounted for the largest share of the market attributing to large number of healthcare reforms, high prevalence of heart failures, and growing medical tourism.

Some of the key players in global continuous cardiac monitoring devices market include Boston Scientific Corporation, Cardiac Science Corporation, Deltex Medical, Edwards Lifesciences Corporation, GE Healthcare, LiDCO Group plc, Medtronic, Mennen Medical, Phillips Healthcare, PULSION Medical Systems, Siemens Healthcare, and Toshiba Medical Systems.
