## Abstracts

According to Statistics MRC, the Global Conveyor Belt Market is accounted for \$4.49 billion in 2020 and is expected to reach \$6.79 billion by 2028 growing at a CAGR of 5.3% during the forecast period. Rising industrial development activities and growing demand from the power generation, mining, and manufacturing industries are driving the market growth. However, high capital investment for setting manufacturing facility and maintenance costs are hampering the growth of the market.

Conveyor belts are the most commonly used industrial component that simplifies the process of carrying various materials and objects from one place to another, especially in industrial environments. Conveyor systems offer quick and efficient transportation for a wide variety of heavy and bulky materials and are extensively used in the material handling and packaging industries.

Based on the installation, the stationary segment is going to have lucrative growth during the forecast period as stationary conveyor belts are widely used in many industries to transport a wide variety of bulk materials over short and long distances in a cost-effective manner and also these belts have stable performance, lower cost, and are used to convey various materials. By geography, Asia Pacific is going to have high growth during the forecast period owing to the rapid industrialization, rising demand for conveyor belts in various industries, coupled with increasing government initiatives and funding in countries such as India and China.

Some of the key players profiled in the Conveyor Belt Market include Zhejiang Double Arrow Rubber Co., Ltd., Yokohama Rubber Company, Techniks CNC Machine Tooling, Siban Peosa SA, Bridgestone, ContiTech, Nitta Corporation, MRF, Intralox, Fenner, Elcon Elastomers Pvt.
