## **Abstracts**

According to Statistics MRC, the Global Corporate Power-Purchase Agreement Platforms Market is accounted for \$132.2 billion in 2026 and is expected to reach \$382.6 billion by 2034 growing at a CAGR of 14.2% during the forecast period. Corporate PPA platforms help organizations source renewable power directly from producers via structured, long-term agreements. They simplify negotiations, pricing models, compliance checks, and risk evaluation, allowing firms to achieve sustainability targets more efficiently. Typically, these platforms offer data insights, digital marketplaces, and contract administration features that link corporate buyers with clean energy developers such as solar and wind providers. By enhancing transparency and minimizing complexities, they speed up renewable energy procurement and support carbon reduction initiatives. With rising interest in sustainable energy solutions, these platforms are increasingly vital for businesses aiming for stable energy costs, reliable supply, and verified environmental benefits.

According to Bird & Bird, EY, and PPA Watch association data, corporate PPAs reached record volumes in 2024 with over 68 GW of clean power contracted globally, led by the United States at 28 GW across 184 deals. Spain alone has accumulated 7.4 GW of corporate PPAs to date, while India's installed capacity stands at 499.1 GW with transparency reforms introduced by the Ministry of Power.

## **Market Dynamics:**

### Driver:

#### Growing corporate sustainability commitments

Increasing emphasis on sustainability and carbon neutrality goals among corporations is significantly boosting the demand for corporate PPA platforms. Businesses are actively seeking renewable energy solutions to lower emissions due to regulatory requirements, stakeholder expectations, and brand image considerations. These platforms make it easier to access clean energy from producers while ensuring efficient execution of agreements. They also offer monitoring, reporting, and data insights that support ESG objectives. As sustainability becomes a central business priority, organizations are turning to digital solutions to simplify renewable energy procurement, thereby accelerating the growth of corporate PPA platforms across various global markets.

### Restraint:

#### High initial transaction and advisory costs

Significant upfront expenses involved in establishing corporate PPAs present a key challenge for market growth. The process often requires expert support from legal, financial, and technical professionals, increasing overall costs. Although platforms aim to streamline these activities, onboarding fees, contract customization, and due diligence still demand considerable investment. This can discourage smaller companies from entering the market, even if long-term benefits are attractive. As a result, participation is often limited to large organizations with adequate budgets. The presence of these financial barriers slows wider adoption and restricts the expansion of corporate PPA platforms across diverse business segments.

### Opportunity:

#### Development of standardized and simplified contracts

Creating simplified and standardized agreement formats presents a strong growth opportunity for corporate PPA platforms. Traditional contracts are often complicated and require significant legal involvement, which can delay transactions. By offering ready-to-use templates and efficient workflows, platforms can minimize time and cost burdens. This approach allows smaller businesses to participate more easily in renewable energy procurement. Simplified agreements also enhance clarity and reduce potential risks related to contract misinterpretation. As companies seek faster and more accessible

solutions, platforms that focus on ease of use and standardization can drive broader adoption and strengthen their presence in the corporate PPA market.

Threat:

Increasing competition from traditional energy procurement channels

Rising competition from conventional energy sourcing options presents a threat to corporate PPA platforms. Businesses often prefer working with utilities or energy brokers due to familiarity and simpler processes. Additionally, utilities are introducing renewable energy options such as green tariffs, which compete directly with platform-based PPAs. These alternatives may appear more convenient, reducing the need for digital platforms. As traditional providers improve their services, platforms must innovate and offer added value to stay relevant. Without strong differentiation, they risk losing potential customers, which could limit adoption rates and hinder overall market expansion in the evolving energy procurement environment.

Covid-19 Impact:

The COVID-19 outbreak produced both challenges and opportunities for corporate PPA platforms. In the early stages, financial instability, decreased industrial demand, and constrained budgets caused companies to postpone renewable energy contracts. Supply chain issues and mobility restrictions further delayed project execution and agreement finalization. Despite these setbacks, the crisis strengthened corporate commitment to sustainability and energy security. The shift toward digital operations increased reliance on online platforms for negotiations and transactions. This recovery highlighted the importance of corporate PPA platforms in supporting long-term sustainability and facilitating efficient energy procurement in a post-pandemic environment.

The physical PPAs segment is expected to be the largest during the forecast period

The physical PPAs segment is expected to account for the largest market share during the forecast period as they enable direct transfer of renewable electricity from producers to buyers via existing grid infrastructure. This structure ensures dependable energy supply and aligns well with regulatory requirements, making it a preferred option for many organizations. Companies value these agreements for their transparency, as they allow clear tracking of energy origin and usage. Additionally, physical PPAs provide stable pricing over long periods and integrate effectively with utility systems. Their

widespread acceptance, proven reliability, and compatibility with current energy frameworks have made them the leading segment in the corporate PPA platforms market.

The solar power PPAs segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the solar power PPAs segment is predicted to witness the highest growth rate, driven by falling technology costs and ease of deployment. Solar projects can be implemented in various locations with relatively shorter timelines, making them appealing to businesses seeking efficient renewable energy options. Supportive policies, continuous innovation, and rising demand for sustainable energy solutions are boosting adoption. Corporate PPA platforms are actively promoting solar agreements by enabling seamless connections between buyers and project developers. With companies increasingly focusing on affordable and clean energy sources, solar PPAs are emerging as the most rapidly growing segment in this market.

#### **Region with largest share:**

During the forecast period, the North America region is expected to hold the largest market share because of its advanced renewable energy sector and strong emphasis on corporate sustainability goals. The region benefits from a robust regulatory environment and a high presence of global companies committed to reducing carbon emissions through long-term renewable energy contracts. The United States plays a key role, with major corporations and technology firms actively engaging in renewable sourcing agreements. Continuous investments in clean energy projects and favourable policy support further enhance North America's position as the leading region in this market.

#### **Region with highest CAGR:**

Over the forecast period, the Asia-Pacific region is anticipated to exhibit the highest CAGR, supported by rapid economic development and expanding energy requirements. Major economies like China, India, Japan, and Australia are increasingly shifting toward renewable energy procurement through corporate PPAs to achieve sustainability targets and reduce reliance on conventional fuels. Strong government support, policy incentives, and large-scale investments in clean energy infrastructure are driving adoption. Rising corporate participation and growing awareness of green energy solutions are accelerating platform usage, making Asia-Pacific the most rapidly

expanding market globally.

### **Key players in the market**

Some of the key players in Corporate Power-Purchase Agreement Platforms Market include Schneider Electric, Enel X, RWE Renewables, Statkraft, ENGIE, Vattenfall, E.ON, EDF Renewables, Orsted, Iberdrola Renewables, Nexamp, LevelTen Energy, Clearloop, Hannon Armstrong, Zeigo, Pexapark, ElectricityMap and WattTime.

### **Key Developments:**

In April 2026, Statkraft and SUNCATCHER have signed an agreement covering the marketing of three combined solar and battery storage systems in Germany. Concluded at the end of February, the agreement underlines Statkraft's leading role in the fast-growing hybrid segment in Germany. It illustrates how solar PV generation and battery storage can be combined in an economically efficient way, also supporting the grid-friendly expansion of renewable energy.

In November 2025, Schneider Electric announced a two-phase supply capacity agreement (SCA) totaling \$1.9 billion in sales. The milestone deal includes prefabricated power modules and the first North American deployment of chillers. The announcement was unveiled at Schneider Electric's Innovation Summit North America in Las Vegas, convening more than 2,500 business leaders and market innovators to accelerate practical solutions for a more resilient, affordable and intelligent energy future.

In August 2025, Engie SA has recently signed its first 100% virtual storage agreement in the Australian market, a five-year, derivatives-only deals with Australia's AGL Energy Limited. The contract represents a financial structure that replicates how a battery works on the market. The agreement enables the French company to offer firming capacity to its customers without relying on physical storage assets.

### **Agreement Types Covered:**

Physical PPAs

Virtual & Synthetic PPAs

**Contract Durations Covered:**

Short-Term PPAs (<5 years)

Medium-Term PPAs (6-10 years)

Long-Term PPAs (>10 years)

**Energy Sources Covered:**

Solar Power PPAs

Wind Power PPAs

Hydro Power PPAs

Biomass & Waste-to-Energy PPAs

**Buyer Types Covered:**

Large Enterprises

SMEs (Small & Medium Enterprises)

Public Sector & Institutions

**Platform Models Covered:**

Marketplace Platforms

Direct Procurement Platforms

Aggregator Platforms

**Regions Covered:**

## North America

United States

Canada

Mexico

## Europe

United Kingdom

Germany

France

Italy

Spain

Netherlands

Belgium

Sweden

Switzerland

Poland

Rest of Europe

## Asia Pacific

China

Japan

India

South Korea

Australia

Indonesia

Thailand

Malaysia

Singapore

Vietnam

Rest of Asia Pacific

South America

Brazil

Argentina

Colombia

Chile

Peru

Rest of South America

Rest of the World (RoW)

Middle East

Saudi Arabia

United Arab Emirates

Qatar

Israel

Rest of Middle East

Africa

South Africa

Egypt

Morocco

Rest of Africa

**What our report offers:**

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2023, 2024, 2025, 2026, 2027, 2028, 2030, 2032 and 2034
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

**Free Customization Offerings:**

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

## Contents

### **1 EXECUTIVE SUMMARY**

- 1.1 Market Snapshot and Key Highlights
- 1.2 Growth Drivers, Challenges, and Opportunities
- 1.3 Competitive Landscape Overview
- 1.4 Strategic Insights and Recommendations

### **2 RESEARCH FRAMEWORK**

- 2.1 Study Objectives and Scope
- 2.2 Stakeholder Analysis
- 2.3 Research Assumptions and Limitations
- 2.4 Research Methodology
  - 2.4.1 Data Collection (Primary and Secondary)
  - 2.4.2 Data Modeling and Estimation Techniques
  - 2.4.3 Data Validation and Triangulation
  - 2.4.4 Analytical and Forecasting Approach

### **3 MARKET DYNAMICS AND TREND ANALYSIS**

- 3.1 Market Definition and Structure
- 3.2 Key Market Drivers
- 3.3 Market Restraints and Challenges
- 3.4 Growth Opportunities and Investment Hotspots
- 3.5 Industry Threats and Risk Assessment
- 3.6 Technology and Innovation Landscape
- 3.7 Emerging and High-Growth Markets
- 3.8 Regulatory and Policy Environment
- 3.9 Impact of COVID-19 and Recovery Outlook

### **4 COMPETITIVE AND STRATEGIC ASSESSMENT**

- 4.1 Porter's Five Forces Analysis
  - 4.1.1 Supplier Bargaining Power
  - 4.1.2 Buyer Bargaining Power
  - 4.1.3 Threat of Substitutes
  - 4.1.4 Threat of New Entrants

- 4.1.5 Competitive Rivalry
- 4.2 Market Share Analysis of Key Players
- 4.3 Product Benchmarking and Performance Comparison

## **5 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY AGREEMENT TYPE**

- 5.1 Physical PPAs
- 5.2 Virtual & Synthetic PPAs

## **6 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY CONTRACT DURATION**

- 6.1 Short-Term PPAs (?5 years)
- 6.2 Medium-Term PPAs (6-10 years)
- 6.3 Long-Term PPAs (>10 years)

## **7 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY ENERGY SOURCE**

- 7.1 Solar Power PPAs
- 7.2 Wind Power PPAs
- 7.3 Hydro Power PPAs
- 7.4 Biomass & Waste-to-Energy PPAs

## **8 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY BUYER TYPE**

- 8.1 Large Enterprises
- 8.2 SMEs (Small & Medium Enterprises)
- 8.3 Public Sector & Institutions

## **9 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY PLATFORM MODEL**

- 9.1 Marketplace Platforms
- 9.2 Direct Procurement Platforms
- 9.3 Aggregator Platforms

## **10 GLOBAL CORPORATE POWER PURCHASE AGREEMENT PLATFORMS MARKET, BY GEOGRAPHY**

### 10.1 North America

10.1.1 United States

10.1.2 Canada

10.1.3 Mexico

### 10.2 Europe

10.2.1 United Kingdom

10.2.2 Germany

10.2.3 France

10.2.4 Italy

10.2.5 Spain

10.2.6 Netherlands

10.2.7 Belgium

10.2.8 Sweden

10.2.9 Switzerland

10.2.10 Poland

10.2.11 Rest of Europe

### 10.3 Asia Pacific

10.3.1 China

10.3.2 Japan

10.3.3 India

10.3.4 South Korea

10.3.5 Australia

10.3.6 Indonesia

10.3.7 Thailand

10.3.8 Malaysia

10.3.9 Singapore

10.3.10 Vietnam

10.3.11 Rest of Asia Pacific

### 10.4 South America

10.4.1 Brazil

10.4.2 Argentina

10.4.3 Colombia

10.4.4 Chile

10.4.5 Peru

10.4.6 Rest of South America

### 10.5 Rest of the World (RoW)

- 10.5.1 Middle East
  - 10.5.1.1 Saudi Arabia
  - 10.5.1.2 United Arab Emirates
  - 10.5.1.3 Qatar
  - 10.5.1.4 Israel
  - 10.5.1.5 Rest of Middle East
- 10.5.2 Africa
  - 10.5.2.1 South Africa
  - 10.5.2.2 Egypt
  - 10.5.2.3 Morocco
  - 10.5.2.4 Rest of Africa

## **11 STRATEGIC MARKET INTELLIGENCE**

- 11.1 Industry Value Network and Supply Chain Assessment
- 11.2 White-Space and Opportunity Mapping
- 11.3 Product Evolution and Market Life Cycle Analysis
- 11.4 Channel, Distributor, and Go-to-Market Assessment

## **12 INDUSTRY DEVELOPMENTS AND STRATEGIC INITIATIVES**

- 12.1 Mergers and Acquisitions
- 12.2 Partnerships, Alliances, and Joint Ventures
- 12.3 New Product Launches and Certifications
- 12.4 Capacity Expansion and Investments
- 12.5 Other Strategic Initiatives

## **13 COMPANY PROFILES**

- 13.1 Schneider Electric
- 13.2 Enel X
- 13.3 RWE Renewables
- 13.4 Statkraft
- 13.5 ENGIE
- 13.6 Vattenfall
- 13.7 E.ON
- 13.8 EDF Renewables
- 13.9 Orsted
- 13.10 Iberdrola Renewables

- 13.11 Nexamp
- 13.12 LevelTen Energy
- 13.13 Clearloop
- 13.14 Hannon Armstrong
- 13.15 Zeigo
- 13.16 Pexapark
- 13.17 ElectricityMap
- 13.18 WattTime
