Abstracts

According to Statistics MRC, the Global Cosmetic Surgery Products market is estimated at \$8.4 billion in 2015 and is expected to grow at a CAGR of 9.77% to reach \$16.14 billion by 2022. Factors such as growing geriatric population, increased beauty consciousness, rising disposable incomes and high adoption rate for innovative cosmetic products are fueling the market growth. However, expensive costs of treatments including physician's fees, stringent regulatory approvals and lack of reimbursement options in developed countries are restraining the market.

Breast augmentation and the liposuction have been the top two popular cosmetic surgical methods. North America accounts for the biggest market share due to the increasing elder population. North America and Europe have always been the key markets for these cosmetic procedures and products over the years. These two regions are youth-centered and more importance is on visual looks of an individual.

Some of the key players in the global cosmetic surgery products market are 3M Company, Johnson & Johnson, Lumenis Limited, Palomar Medical Technologies Incorporated, BioForm Medical, Cutera Incorporated, Cynosure Incorporated, Dectro International, Hoya Corporation, Candela, Allergan Incorporated, Covidien plc, Sanofi-Aventis, Smith & Nephew plc, and Solta Medical Incorporated.
