According to Statistics MRC, the Global Critical Care Diagnostics market is accounted for \$0.86 billion in 2016 and is expected to reach \$1.34 billion by 2023 growing at a CAGR of 6.5% from 2016 to 2023. Growing aging population and chronic health concerns, improving advancements in technologies and rapid attentiveness, increasing acceptance of these tests by physicians and patients are some of factors triggering the market growth. Furthermore, growing incidence of chronic disease such as cancer, heart disease, and diabetes are fuelling the market growth.

However, increased price of the molecular diagnostics and shortage of skilled professionals are some of the factors restraining the market growth.

Microbial and Infectious diseases test segment is anticipated to grow at the highest CAGR during the forecast period. The growth is owing to the quick and accurate test results to diagnose the disease. Immunoproteins diagnostic test segment accounted for largest market revenue due to increase massive demand for early disease diagnosis. North America represents as the largest market in terms of revenue. High research and development activities, higher demand from U.S boosting the North America market. Asia Pacific is projected to dominate the global market in terms of revenue due to rising specialty hospitals and convalescing healthcare services and infrastructures in rural areas.
