## Abstracts

According to Statistics MRC, the Global Dairy Packaging Market is accounted for \$67.93 billion in 2020 and is expected to reach \$109.91 billion by 2028 growing at a CAGR of 6.2% during the forecast period. Factors such as growth in population, high spending on food and beverages, and inflating disposable income are driving the growth of the market. However, hazardous effects of plastics and other non-biodegradable packaging materials are hampering the growth of the market.

Packaging plays an important factor in the distribution of dairy products as they are known to provide protection, information as product content, procedure and ingredient information. The packaging is done to provide the food to the consumer in good condition. It assists in protecting food against chemical and biological damages.

Based on the type, the flexible segment is anticipated to expand at a rapid pace during the forecast period owing to the ability of the product to offer thinner, lighter, and compact packing along with its superior performance. By geography, North America is going to have high growth during the forecast period which can be attributed to the rapidly changing consumer preferences towards packaged food coupled with the increased consumption of dairy products.

Some of the key players profiled in the Dairy Packaging Market include Berry Global Group, Inc, Amcor PLC, Mondi, Huhtamaki Group, Ball Corporation, Wincap Ltd, Saudi Basic Industries Corporation, Sealed Air Corporation, Bemis Company, Inc., Rexam, Stora Enso Oyj, Consolidated Container Company LLC, RPC Group, Greiner Packaging international GmbH, and International Paper Company.
