## Abstracts

According to Statistics MRC, the Global Data Science Platform Market is accounted for \$19.75 billion in 2016 and is expected to reach \$128.21 billion by 2022 growing at a CAGR of 36.5% during the forecast period. Advanced technology in big data and growing demand for public cloud are some of the key factors favouring the market growth. However, strict government regulations are hampering the market. Data explosion and huge investment costs are major challenges in the market.

By deployment model, on-demand segment is anticipated to grow at a significant CAGR attributed to enhanced integration and low operational cost. By geography, North America commanded the largest market share attributed to the technical experts and existence of large enterprises. Asia Pacific is anticipated to grow at the fastest CAGR owing to higher Foreign Direct Investments (FDIs).

Some of the key players in Data Science Platform market include Domino Data Lab, Alteryx, Continuum Analytics, Feature Labs, Inc., Civis Analytics, IBM Corporation, Rapidminer, Inc., DataRobot, Inc., Microsoft Corporation, Google, DataRPM, Rexer Analytics, Sense, Inc., BRIDGEi2i Analytics Solutions and Dataiku.
