Abstracts

According to Statistics MRC, the Global Decorative Glass market is expected to grow at a CAGR of 5.8% during the forecast period. Increasing emphasis on modernization by governments especially in developing regions, the surge in the number of smart cities and smart home projects and advancements in technology are some of the major factors fuelling the demand for decorative glass. However, the closure or delays in several construction projects as a result of stringent lockdown restrictions in different regions is restraining market growth.

Decorative glass is widely used in residential and commercial buildings. It opens up an extensive range of opportunities for artistic expression as decorative glass is a versatile and sustainable material. Decorative glass meets different functional and sustainability requirement as it enables designers to bring their vision to life with architectural and interior design features.

Based on application, the building & construction segment is going to have lucrative growth during the forecast period due to an increase in the number of construction projects worldwide, a focus on innovations, and entry of new manufacturing technologies. The growing adoption of decorative glass across residential and commercial construction sectors is expected to have a positive impact on the global decorative glass market during the forecast period.

By geography, Asia Pacific is estimated to continue to expand at a rapid pace during the forecast period due to the rise in demand for decorative glass is high in the Asia Pacific, particularly in China, owing to an increase in consumption of decorative glass products in residential and commercial applications such as offices, malls, hotels & restaurants, and casinos in the region.
