Abstracts

Statistics MRC, are pleased to announce the latest publication of Global Deep Packet Inspection (DPI) Market. Embedded and integrated DPI, usage of technology in traffic filtering for regulatory compliance, increasing need for monetizing and optimizing internet services, demand for detection of malicious software, inspection of data packets and anti-terrorism are the factors responsible for fuelling the market growth. However, lack of awareness about the risks associated with cyber-attacks and privacy concerns curb the market growth.

Based on Application, Intrusion Detection System (IDS) provide an effective layer of security to an organization's internal network. These systems monitors inbound, outbound, and network based traffic and provide additional layer of security against any malicious activities. Intrusion detection system (IDS) can be implemented to protect a company's computer networks from cyber attacks.

Asia Pacific is projected to dominate the regional market due to increasing cyber crimes as well as China, India and Japan has led to a tremendous increase in the number of subscribers.

Some of the key players in Global Deep Packet Inspection (DPI) market are Allot Communications Ltd., Bivio Networks, Inc., Broadcom Ltd., Cisco Systems, Inc., Packet Networks, Inc., Huawei Technologies Co., Ltd., Procera Networks, Qosmos, R&S Cybersecurity ipoque GmbH, Sandvine Incorporated, SonicWALL L.L.C and Vedicis.
