Abstracts

According to Statistics MRC, the global Dental Chairs Market is accounted for \$438.35 million in 2016 and expected to grow at a CAGR of 5.0% to reach \$618.1 million by 2023. Factors such as advanced infrastructure in the medical and healthcare industry, growth in number of dentists and dental practices, awareness among people about oral health and hygiene, favourable reimbursement subsidies will propel the market growth. However, the high cost associated with advanced dental chairs is hampering the market growth.

Based on application, in Oral Surgery Dental Chairs segment, the latest approach is integration of electric handpieces, piezo electric scalers, high speed curing lights and intra-oral cameras into the delivery system all working off one foot control and/or touch pad control for many leading equipment manufacturers. Many manufacturers have attached monitor mounts on the chair or light post or mount from the ceiling or wall to make viewing intra-oral photographs and radiographs easier for operators and patients. The portable dental chair provides a greater assistance to disabled patients in the out of reach places.

Europe is witnessed to be the largest market due to growing patient pool with teeth disorders in the region. Asia Pacific is accounted for significant rise due to growing awareness among consumers about oral health.

Some of the key players in global Dental Chairs market are A-dec, Ritter Dental, KaVo Dental, SMTmax, Danaher, Sirona Dental Systems, Technodent, AMD LASERS, Cefla, DentaleEZ, Ivoclar Vivadent AG, DCI International, Planmeca Oy, Midmark Corporation and Morita.
