According to Statistics MRC, the Global Digital Oilfield Solutions market is expected to grow from \$28.31 billion in 2016 to reach \$40.61 billion by 2022 with a CAGR of 6.1%. Growing exploration & production activities, increasing demand to minimize production costs, and raising safety concerns are some of the factors fueling the market growth. In addition, recent technological developments in oilfield solutions are bolstering the market growth. However, fluctuating oil prices, low adoption of new technologies are limiting the market growth.

Automation & Instrumentation segment is expected to witness a highest growth rate during the forecast period due to limited human capital in industry and optimize the costs of automated oilfield process. Middle East is one of the key markets for digital oilfield solutions.
