## Abstracts

According to Statistics MRC, The Global Digital Photograph Market is accounted for \$42.1 billion in 2016 and expected to grow at a CAGR of 3.6% to reach \$54.01 billion by 2023. The market is driven by innovation in technologies for creating videos and photographs, innovative sensors such as charged couple devices (CCD) and rising demand for ancillary equipment. On the other hand, high initial cost to acquire the camera and need of excellent skills to operate it are inhibiting the market growth.

Asia-Pacific is expected to dominate market share due to higher product penetration, rising disposable income, especially in developing countries as well as Japanese corporations are expected to spend on research and development. North America and Europe contribute significantly to the market growth, because of high purchasing potential of people in the countries of the U.S., the U.K., Canada, France, and Germany.

The key players in global Digital Photograph market are Sony, Canon, Kodak, Panasonic, Fujifilm, Samsung Electronics, Toshiba, Olympus, Epson, Nikon, PENTAX and Hewlett-Packard.
