## Abstracts

According to Statistics MRC, the Global Disconnecter Switch market is expected to grow from \$9.75 billion in 2016 to reach \$15.69 billion by 2023 with a CAGR of 7.03%. Some of the driving factors such as rising safety concerns, increase in transmission and distribution network and rapid growth in industrialization and urbanization are fuelling the market. However, low quality products and frequent change in prices of raw materials are some restraints limiting the market growth. On the other hand, growing demand for renewables and power are providing the significant growth opportunities for the market.

By voltage range, low voltage disconnect switch segment leads the global market as these switches are used in many sectors like photovoltaic, commercial applications and power distribution. Based on geography, North America is expected to grow at the highest CAGR over the forecast period due to increase in the renewable power generation.

Some of the key players in global Disconnecter Switch market include WEG SA, Socomec, Siemens AG, Schneider Electric SE, Mersen S.A., Littelfuse Inc., Leviton Manufacturing Co., Inc., ABB Ltd., Crompton Greaves Limited, Delixi Electric Co.
