## Abstracts

According to Statistics MRC, the Global Disposable Cups market accounted for \$13.77 billion in 2018 and is expected to reach \$27.75 billion by 2027 growing at a CAGR of 8.1% during the forecast period. Increasing awareness of hygienic products, the growth of commercial foodservice market and various features of the disposable cup such as recyclability, low cost etc are the key driving factors for the market growth. However, the increased level of pollution may hinder market growth.

A disposable cup is a type of tableware. Some of the disposable cup types include paper cups, plastic cups and foam cups. They are basically produced for single use. Disposable cups and other similar disposable products constitute a major source of consumer and household waste, such as paper waste and plastic waste.

Based on Material Type, the Plastic segment is likely to have a huge demand due to the increasing use of food vending machines in offices, schools, shopping malls, and universities. By geography, Asia Pacific is going to have a lucrative growth during the forecast period owing to the population growth in this region as well as the presence of major disposable cup manufacturing industries.

Some of the key players profiled in the Disposable Cups market include Benders Paper Cups, Berry Plastics Corporation, Cosmoplast Industries Co, Dart Container, FrugalPac limited, Greiner Packaging GmbH, James Cropper Plc, Kap Cones, Lollicup USA, and Solo Cup Company.
