According to Statistics MRC, the Global Dried Blueberries market is accounted for \$358.08 million in 2017 and is expected to reach \$703.97 million by 2026 growing at a CAGR of 7.8% during the forecast period. Blueberries are expected to enlarge the ledge life of blueberries and will improve the dietary rate and taste of the product is one of the key factors which are driving the market growth. However, the volatile production of dried blueberries and the consequent high pricing will keep companies on toes and hard-pressed to offer cost-effective variants are the causes limiting the market growth.

Dried blueberries are obtained after the exclusion of water substance on or after the berries through ventilation method including solar ventilation, vacuum drying, microwave drying, and freeze drying. Drying contributes and enhances taste, diet profile, ridge life, and strength payback of blueberries, therefore, contributing to the expansion of the dried blueberries market.

Based on Product Type, the Freeze Dried blueberries is correspondent to about 4 ¼ pounds clean blueberries. Throughout the freeze-drying procedure the blueberries are initially frozen and after that place through a procedure in which all the water in the berries goes as of a frozen to fizzy condition. This procedure makes it potential to get rid of water without removing dietary portions.

By Geography, North America is accredited to the enormous manufacture of blueberries in the market. Furthermore, the rising consumption of personal care stuff in order to improve the personal appeal joined through high disposable profits of the residents are some factors projected to grow in this region.
