Abstracts

Statistics MRC, is pleased to announce this latest publication. Increasing demand for fried and processed food, rising number of restaurants and fast food joints, urbanization and growing population are factors favoring the market growth. However increasing health problems caused by oils and fats are hindering the market growth.

Edible oils and fats are esters of carboxylic acids and glycerols. Oils are liquid at room temperature while fats are partially solid at room temperature. They are made up of poly-saturated, mono-saturated fatty acids and saturated fats. Saturated fat raises the body cholesterol levels, whereas polyunsaturated and monosaturated fats tend to decrease the cholesterol level in the body. Monounsaturated are 'Good' fats that are majorly found in plant sources, such as avocados, nuts, peanuts and olive oil.

Based on product, corn oil segment is projected to grow due to growing demand of corn oil from industrial application is fuelling the market. It provides various health products like decreasing heart diseases, lowers the cholesterol and blood pressure. It is known as healthy edible oil and is used as cooking oil. It has various therapeutic properties which makes it vulnerable for its use in various applications.

By geography, North America is anticipated to grow due to rise in technically advanced methods and increases in consumption of foodstuff among the people are fuelling the market growth in this region. Asia Pacific is expected to grow owing to resources of crops and livestock is factor driving the market.
