Abstracts

According to Statistics MRC, the Global Electric Cargo Bikes Market is accounted for \$550.00 million in 2020 and is expected to reach \$1,568.92 million by 2028 growing at a CAGR of 14.0% during the forecast period. Factors such as growing concerns regarding air pollution, developments in the e-commerce industry, and increasing awareness regarding sustainable products are driving the growth of the market. However, high price of electric cargo bikes and large size of the batteries are hampering the growth of the market.

Electric cargo bikes are generally lightweight and are operated on battery. Hence, they have a low running cost and are environment friendly. Its specially-designed frames help in carrying larger and heavier loads.

Based on the product, the two-wheeler segment is anticipated to expand at a rapid pace during the forecast period owing to its ability to handle large delivery quantities and to provide efficient mobility experience. By geography, Europe is going to have high growth during the forecast period which can be attributed to the wide acceptance of electric cargo bikes and the government initiatives in encouraging its adoption.

Some of the key players profiled in the Electric Cargo Bikes Market include Amsterdam Bicycle Company, Urban Arrow, Butchers & Bicycles ApS, Worksman Cycles, Triobike,

Yuba Electric Cargo Bikes, Pedego Electric Bikes, Xtracycle Inc, Rad Power Bikes Inc, Riese & Müller GmbH, Tern Bicycles (Mobility Holdings, Ltd.), XYZ Cargo, Carqon (Accell Group N.V.), Babboe, and Cero Electric Cargo Bikes.
