Abstracts

According to Statistics MRC, the Global Essential Oils Market is accounted for \$8.46 billion in 2020 and is expected to reach \$19.78 billion by 2028 growing at a CAGR of 11.2% during the forecast period. Growth in research & development activities, increase in demand for aromatherapy, and rise in demand for natural ingredients are the major factors propelling the market growth. However, depletion of natural resources and side-effects associated with certain essential oils are hampering the market growth.

An essential oil is a concentrated hydrophobic liquid containing volatile (easily evaporated at normal temperatures) chemical compounds from plants. Essential oils are also known as volatile oils, ethereal oils, aetheroleum, or simply as the oil of the plant from which they were extracted, such as oil of clove. An essential oil is essential in the sense that it contains the essence of the plant's fragrance which is the characteristic fragrance of the plant from which it is derived. The term essential used here does not mean indispensable or usable by the human body, as with the terms essential amino acid or essential fatty acid, which are so called because they are nutritionally required by a given living organism.

Based on application, the spa & relaxation segment is going to have a lucrative growth during the forecast period owing to the rising awareness about using natural and organic products. Personal care emerged as another important segment within spa and relaxation in the global market. Essential oils are majorly used in cosmetics, toiletries, and fragrances. In personal care, they are used in various applications, including beautifying the hair and skin, makeup, and color cosmetics.

By geography, Asia Pacific is going to have a lucrative growth during the forecast period due to the presence of a large population, along with various untapped markets, which are likely to attract key players' attention to expand and establish their operation and distribution facilities in this region.

Some of the key players profiled in the Essential Oils Market include BIOLANDES SAS, Cargill, Inc, d?TERRA International LLC, DuPont, Falcon, Farroti, Firmenich SA, Givaudan SA, International Flavors & Fragrances Inc, Koninklijke DSM N.V, Mane, ROBERTET SA, Rocky Mountain Oils LLC, Sensient Technologies Corporation, Symrise, The Lebermuth Company, Inc, Ungerer Limited, and Young Living Essential Oils.
