## Abstracts

According to Statistics MRC, the Global Ethylene Vinyl Acetate Market is accounted for \$9.71 billion in 2020 and is expected to reach \$14.90 billion by 2028 growing at a CAGR of 5.5% during the forecast period. Significant growth in solar power industry, huge economic growth and increasing demand from packaging industry are driving the market growth. However, intervention of substitute materials is hampering the growth of the market.

Ethylene vinyl acetate (EVA) is formed by the copolymerization of ethylene and vinyl acetate and has brilliant properties of toughness. When transformed into a porous material, EVA acts similar to rubber due to its property of elasticity. Compared with low-density polyethylene (LDPE), EVA is three times more flexible. This material has various properties, such as good barrier properties, ultraviolet radiation resistance, low-temperature toughness, stress-crack resistance and hot-melt adhesive waterproof properties.

Based on the application, the films manufacturing segment is going to have lucrative growth during the forecast period due to rising awareness about the use of solar energy, which is enhancing the demand for EVA film in photovoltaic cells. The demand for ethylene vinyl acetate for film is likely to experience considerable growth in the forecast period due its growing demand in the areas of solar photovoltaic cells, packaging, and agriculture.

By geography, Asia Pacific is going to have high growth during the forecast period owing to the growth in the various end use industries, such as solar photovoltaic cells, packaging, footwear and wire & cable. China is the largest market for ethylene vinyl acetate due to its high consumption in footwear, solar, automotive, and wire & cable

supported by the high domestic demand.

Some of the key players profiled in the Ethylene Vinyl Acetate Market include Arkema, Asia Polymer, BASF SE, Braskem, Bridgestone, Celanese, Dow, ExxonMobil, Formosa Plastics, Hanwha Chemical, Innospec, LyondellBasell, Repsol, Sumitomo Chemical and Versalis.
