Abstracts

According to Statistics MRC, the Global Feed Premix Market is accounted for \$22.88 billion in 2020 and is expected to reach \$42.98 billion by 2028 growing at a CAGR of 8.2% during the forecast period. Growth in feed production, increase in the demand and consumption of livestock-based products and growth in compound feed consumption are driving the market growth. However, increase in cost of feed ingredients is hampering the growth of the market.

Feed premixes are complex mixtures of feed supplements, trace elements, essential minerals, vitamins, and other nutritional additives including amino acids and proteins incorporated in the feed. The vital purpose of food premixes is to deliver the right micronutrients to the livestock. Premixing can be done mechanically, manually, continuously, or controlled by computer devices. Some premixes are designed to serve specific functions such as fish feed premixes are prepared to answer nutritional needs of fishes.

Based on the ingredient type, the amino acids segment is going to have lucrative growth during the forecast period. Amino acids are broadly used as feed premixes to provide the nutrients that are required to overcome dietary deficits. Amino acids function as the building blocks for protein development in animals and are essential to enhance meat quality and quantity.

By geography, Asia Pacific is going to have high growth during the forecast period. The market in the region is primarily driven by the existence of a large livestock population and the growth rate attributed to it. Moreover, the region has witnessed a rise in the number of feed mills and feed production, particularly in Japan and India. This surge in the number of feed mills in the region reflects the growth in feed production.

Some of the key players profiled in the Feed Premix Market include Advanced Animal

Nutrition, Advanced Enzyme Technologies, Agrofeed Ltd., Alltech, Archer Daniels Midland, Associated British Foods, Avitech Nutrition Pvt. Ltd., BEC Feed Solutions, Cargill Incorporated, Charoen Pokphand Foods PCL, Cladan, De Heus Animal Nutrition, DLG Group, Kaesler Nutrition and Kemin Industries.

What our report offers:

Market share assessments for the regional and country-level segments

Strategic recommendations for the new entrants

Covers Market data for the years 2019, 2020, 2021, 2025 and 2028

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances
