Abstracts

According to Statistics MRC, the Global Fire and Gas Detection System market is projected to grow at a CAGR of 7.4% during the forecast period 2017-2026. The growth of wireless instrumentation in safety systems and reduce in the price of IR systems and manufacturers are offering IR sensors with high level of customization are some of the factors favouring the market growth.

Based on end user, oil and gas segment has a significant growth. The oil and gas industry involves tank farms, storage areas, and loading/unloading operations of oil and gas that are easily exposed to fire and explosion. Products designed to reduce risks in hazardous oil and gas applications must be certified to particular standards, and those who offer product certification are responsible for examining these products to ensure that they meet functional safety requirements.

By geography, Middle East is the largest contributor of the oil and gas extraction and production facilities. Rising oil production and the need to stand by the rigid bodies in the region have surged the need. Oil production has improved with the raise in E&P activities and growing the risk of fire incidents.

Some of the key players in global Fire and Gas Detection System market include GIL Automation, Schneider Electric, Honeywell International Inc., Omron Corporation, Hochiki Corporation, Siemens, ABB, Yokogawa Electric Corporation, Emerson Process Management, Tyco International plc, Rockwell Automation, Inc, MSA Safety Incorporated, Norgren Limited, Johnson Controls and Autronica Fire and Security AS.
