According to Statistics MRC, the Global Fire Suppression Equipment Market is accounted for \$24.90 billion in 2020 and is expected to reach \$43.79 billion by 2028 growing at a CAGR of 6.7% during the forecast period due to the significant increase in fire related accidents especially in the oil & gas industry, commercial, residential, mining, healthcare and other sector is the major factors driving the market growth. However, a higher installation and maintenance cost is restraining the market growth.

Fire suppression equipment alerts the environment about a hazardous situation, fire break out, or smoke by automatic or manual detection systems.

Based on application, the industrial segment is estimated to have a lucrative growth during the forecast period owing to various manufacturing and production activities involving chemicals and machinery that are flammable and can lead to fires. By geography, North America is going to have high growth during the forecast period due to the presence of several regulations regarding fire protection and safety that are to be followed by residential, commercial and industrial sectors.

Some of the key players profiled in the Fire Suppression Equipment Market include Consilium AB, Gentex Corporation, Halmaplc, Hochiki Corporation, Honeywell International Inc, Johnson Controls, Robert Bosch GmbH, Siemens AG, Semco Maritime A/S Company.
