Abstracts

According to Statistics MRC, the Global Flavor Masking Agents Market is accounted for \$211.95 million in 2020 and is expected to reach \$383.67 million by 2028 growing at a CAGR of 7.7% during the forecast period. Factors such as increasing demand for processed foods, growing sports nutrition industry, and rising awareness regarding healthy diet are driving the growth of the market. However, effect of Covid-19 pandemic on the food and beverages industry is hampering the growth of the market.

Flavor masking agents are used to cover undesirable flavor notes in the food products. It is a combination of different agents that work together to mask the undesirable note. Commercial flavor masking agents are a complex mixture of modifiers, enhancers and inhibitors that modifies or enhances certain flavors while inhibits other flavors.

Based on the application, the pharmaceuticals and nutraceuticals segment is anticipated to expand at a rapid pace during the forecast period as the masking of unpleasant flavours in drugs would help to attain patient acceptability. By geography, Asia Pacific is going to have high growth during the forecast period which can be attributed to the increasing adoption of western lifestyle and considerable young population in the region.

Some of the key players profiled in the Flavor Masking Agents Market include Cargill
