Abstracts

According to Statistics MRC, the Global Fluorinated Fluids Market is accounted for \$784.68 million in 2017 and is expected to reach \$1721.01 million by 2026 growing at a CAGR of 9.1%. Factors such as rising demand in thermal management issues in industries such as electronics & semiconductor, automotive, and aerospace are fueling the market growth. However, high capital investment cost of technology for the development and manufacturing of engineered fluids (Fluorinated Fluids) acts as a hindrance for the growth of the market. Fluorinated fluids are utilized for extreme conditions because of their unique properties including non-flammability, low and high temperature, stability, and non-toxicity

Amongst end user, electronics & Semiconductor segment has significant market share during the forecast period due to the increase in revenue, mainly by diversification into new technologies such as the Internet of things (IoT) and artificial intelligence (AI). By geography, Asia Pacific region has emerged as the propelling consumer of engineered fluids (fluorinated fluids), owing to the growth in demand for engineered fluids (fluorinated fluids) in countries such as China, Japan, India, South Korea, and Indonesia.

Some of the key players in Fluorinated Fluids market include the 3M Company, Halocarbon Products Corporation, Halopolymer Kirovo-Chepetsk, The Chemours Company, IKV Tribology, Asahi Glass Company, Daikin Industries, F2 Chemicals Ltd., Solvay SA, Honeywell International Inc., Engineered Custom Lubricants, Harves Co.
