Abstracts

According to Statistics MRC, the Global Fruit and Vegetable Seeds Market is accounted for \$9.48 million in 2017 and expected to grow at a CAGR of 9.8% to reach \$22.1 million by 2026. Increasing demand for genetically modified (GM) Crops, growing the market for seed industry, rising investments in small and medium scale urban vegetable farming platform are fuelling the market growth. However, regulations in cultivation of GM crops and unstable climatic conditions are hampering the market growth.

Based on type, leafy segment is projected to grow due to the constant investments for production facilities that encourage seed quality and sustainability by the seed companies are resulting in a rise in demand for such fruit & vegetable seeds. Leafy vegetables are rich source of protein, vitamins A and C and minerals like iron, calcium and phosphorous. These vegetables provide roughage and have an important place in balanced diet.

Conventional seeds are used by farmers because of its high efficiency, ease of use, availability and rising consumer demands and expectations from food industry. Conventional seed crops use far more pesticides than conventional food crops. The context of garden seed really means 'unspecified' or, not disclosed as to chemicals, processes or growing methods were used in the production of the seed.

Asia Pacific is anticipated to be the largest growing market due to rise in agricultural activities and increases in demand for crop produce are driving the market in this region. North America is expected to grow owing to increasing demand in agricultural sector is fuelling the market growth.
