Statistics MRC, are pleased to announce the latest publication of Global Fuel Dispenser Market. Growing number of gas stations, rising inbound and outbound tourism and expanded national and international transportation are some of the key factors fueling the market growth. However, huge repairing price coupled with system difficulty and large capital demand for setting up fueling stations and dispensing systems are hampering the market growth.

Fuel dispensing appliances dispenses and monitors liquid or gaseous fuel. Fuel dispensers utilized to pump liquid fuels such as gasoline, diesel fuel, oil, or kerosene into a vehicle, storage tank, or portable container. Gaseous fuel dispensers might refuel hydrogen- or syngas-powered vehicles or machinery, or simply be worn to move gases from one place to another.

By technology, Submersible fuel dispenser is owing to the small installation and maintenance expenses, the requirement for this technology is rising drastically. The submersible systems utilize a pump submerged into the tank that supplies fuel to all the systems present in the station.

Asia Pacific dominated the largest market share during the forecast period attributed to the rising manufacturing and utilization of dispensing systems in the nation and increasing amount of CNG vehicles and petrol vehicles.

Some of the key players in Fuel Dispenser Market include Bennett Pump, Scheidt & Bachmann, Gilbarco, Zhejiang Datian Machine Co.,Ltd., DEM G. SPYRIDES, Neotec, Censtar Science & Technology Co., Ltd, Dover, Zhejiang Lanfeng Machine Co.
