Abstracts

According to Statistics MRC, the Global Functional Fluids Market is accounted for \$42.20 billion in 2020 and is expected to reach \$69.84 billion by 2028 growing at a CAGR of 6.5% during the forecast period. Augmented industrial growth in Asia-Pacific & Africa and the growing automotive industry are the factors driving the market growth. However, the slow growth of end-use industries is hampering market growth.

Functional fluid is a generic name for a group of compounds that find wide usage in manufacturing industries. They are used in a great array of products such as adhesives, water treatment, brake fluids, plastics, agrochemicals, textiles, colorants, pharmaceuticals, and personal care products.

Based on the end user, the industrial equipment segment is going to have lucrative growth during the forecast period due to the increasing demand for manufacturing industries. Functional fluids are used to reduce stress and friction between surfaces and offer temperature stability, low volatility, oxidation, and corrosion resistance.

By geography, Asia Pacific is going to have high growth during the forecast period due to the increasing industrialism and the shift of the manufacturing systems in the Asia Pacific. Also, extensive automobile production in areas such as India, China, and Japan is driving the regional market growth.

Some of the key players profiled in the Functional Fluids Market include AMSOIL Incorporated, Ashland, BASF SE, BP PLC, Chemtura Corporation, Chevron Corporation, ConocoPhillips, Exxon Mobil Corporation, Fuchs Petrolub AG, Huntsman International LLC, Idemitsu Kosan Co. Ltd, Petrolia Nasional Berhad, Royal Dutch Shell PLC, The DOW Chemical Company, and Warren Oil Company.
