Abstracts

According to Statistics MRC, the Furfural Solvent Solution Market is valued at \$XX million in 2015 and is projected to reach \$XX million by 2022 growing at a CAGR of XX% from 2015 to 2022. Growing demand for metals is the major factor expected to drive the market growth. Increasing environmental concerns and swing towards development of bio-based chemicals are expected to remain as the key drivers for the market growth. However, high cost of production is hindering the market growth. Chinese export trade is expected to be hindered which in turn is expected to pose challenges to the global market in terms of supply. Advancements in production processes are necessary in order to recover yield and reduce production costs.

Asia Pacific region commanded the market share over the forecast period. High rates of export of furfural alcohol, due to growing demand for furan resins is expected to have a positive impact on the furfural market growth.
