Abstracts

According to Statistics MRC, the Global Geomembrane market is estimated at \$2.01 billion in 2016 and is expected to reach \$3.98 billion by 2022 growing at a CAGR of 10.3% from 2016 to 2022. Favourable regulations across the globe and increasing applications are the key factors driving the market growth. However, variation in price of raw material is hampering the market growth. Technological advancements in waste management seem to be opportunity factor for the market growth.

In application segment, waste management segment is accounted for largest market share owing to the increase in pollution and landfills across the regions. High-Density Polyethylene (HDPE) segment in raw materials holds the largest market share compared to LDPE and PVC owing to its vast areas of application. North America accounted for the highest market share as compared to other regions owing to rising demand from mining industry. The Asia Pacific region is expected to grow at a higher CAGR and is anticipated to account for the highest market share during forecast period because of increasing growth in heavy industries in this region.

Some of the key players in the market include Agru America, Inc., Atarfil SI, Carlisle Syntec Systems, Colorado Lining International, Inc., Firestone Building Products Company, LLC, GSE Environmental, LLC, Naue GmbH & Co. Kg, Officine Maccaferri S.P.A, Plastika Kritis S.A., Solmax International, Inc., CETCO, Geofabrics Australasia Pty. Ltd., Carthage Mills, JUTA Group, Nilex Inc. and Bridgestone America.
