The Global Endoscopy Devices Market is estimated to be \$30.1 billion in 2014 and is poised to reach \$47.6 billion by 2022, growing at a CAGR of 5.90% from 2014 to 2022. Some of the key factors driving the market growth are rising preference for minimally invasive surgeries, technological advancements and aging population. Whereas factors such as lack of skilled professionals and high investment costs for endoscopic equipment are restraining the market growth. Growing economic conditions, high income, developing health sectors and a large consumer base in emerging countries like India and China will drive the endoscopy device market opportunities.
