## Abstracts

Statistics MRC, are pleased to announce the latest publication of Global Healthcare Mobile Computers market. Mobile computing solutions, increasing inclination towards patient centric applications, increase in acceptance of smartphones and tablets in healthcare business, growing wireless networks are some of the key factors fueling the market growth. However, lack of standard communication protocols and reimbursement policies, data security issues, short battery life of mobile computers are hampering the market growth.

Healthcare is experiencing a series of interdependent health care reform initiatives at whose cores lies the active involvement of the patient. The use of mobile computing and applications can help make this changeover across healthcare amenities, resulting in fewer hospitals readmissions and augmented patient's outcomes. Mobile health will be a driver for more and more essential patient and provider interaction in a secure and interoperable manner. Clinicians want and need decision making information at their fingertips. Mobile devices are helping to fill current gaps to enhance the physician workflow, proactive decision-making, and oversight with a goal of improving patient care quality, outcomes, and safety.

North America is one of the major regions witnessing the adoption of the healthcare mobile computers. The primary factors attributing to the market growth in these regions are high dissemination of mobile devices, expansion and implementation of pioneering technologies, and the existence of major companies in this region, which improves consumer approachability to mobile computers.

Some of the key players in global Healthcare Mobile Computers market are Airstrip Technologies, Inc., Apple Inc., AT&T Inc., Cerner Corporation, Cisco Systems Inc.,

Hewlett-Packard (HP) Inc., IBM Corporation, McKesson Corporation, Microsoft Inc., Omron Corporation, Oracle Corporation, Philips Healthcare, Qualcomm Inc., SAP SE, Verizon Communications, Inc. and Zebra Technologies Corporation.
