According to Statistics MRC, the Healthcare Robotics Market is estimated at \$3.9 billion in 2015 and is projected to reach \$17.9 billion by 2022 growing at a CAGR of 24.4% from 2015 to 2022. Enhancement of automation technologies, rising baby boomer population, and the rising incidence of disabilities in human beings are some of the key factors driving the market growth. Furthermore, Shortage of healthcare professionals, need to improve quality of life for the disabled and elderly, need to improve surgical procedures and demographic changes are some of the factors boosting the market growth. However, towering purchase and installation costs of medical robotic systems may impede the market growth.

Laparoscopy segment commanded the largest share among healthcare robotics application market. The supremacy of this segment can be accredited to the soaring volume of laparoscopy surgical procedures carried out using robotic systems. Asia-Pacific is expected to grow at the highest CAGR owing to the highest growth in enhancement of automation technologies, rising baby boomer population, and the rising incidence of disabilities in human beings.
