According to Statistics MRC, the Global High Performance Pigments market is accounted for \$4.56 billion in 2015 and is expected to reach \$5.98 billion by 2022 growing at a CAGR of 3.94%. Rising demand for automotive coatings and growing personal care industry particularly in Asia Pacific is expected to remain a key driving factor for the market. Fluctuations in Raw material prices of pigments will pose a challenge to the market growth.

Asia Pacific is expected to witness the highest CAGR during the forecast period owing to its applications in cosmetics and automotive coatings including transmission and differential systems. Inorganic high performance pigment segment accounted for the largest share in the market. The growth is attributed to changes in consumer preferences.
