According to Statistics MRC, the Global Histology & Cytology market is expected to grow from \$8.95 billion in 2016 to reach \$22.25 billion by 2023 with a CAGR of 13.9%. Rapidly increasing incidence of cancer due to the environmental & lifestyle changes, rising standardization of pathology laboratories, scientific advancements in the cell, tissue studies and rising awareness about screening of cancer are likely to drive the market. Furthermore, uninterrupted R&D and arising acceptance of cytological tests are expected to be the vital reasons for the market growth.

On the basis of examination, cytology segment leads the histology & cytology market globally with the biggest market share. Cytology studies about the cell that carries on with the function, chemistry and structure of the examined cells. High particularity, adequate sensitiveness, and low cost are the advantages coupled with cytology segment. Thus, intensity of tests performed was high. Breast screening and cervix are the major applications of cytology. There is a big patient pool and handiness of products for the cervical cancer screening. Also, increasing investments by the key players for the advancement of tests is likely to increase demand for cervical cancer screening.

North America grabbed the top position in the global histology & cytology market. Decent coverage for diagnosis & treatment, government initiatives for the execution of high quality tone screening and accessibility of well-equipped diagnostic clinics are the factors responsible for the dominance of this region. Asia Pacific is expected to be the fastest growing region over the forecast period. Increasing geriatric population, growing cancer incidence and rising awareness about cancer screening in emerging economies such as India, China and Singapore are likely to drive the Asia Pacific histology & cytology market.

Some of the key players in Global Histology & Cytology market include Abbott Laboratories, Dickinson and Company, Sysmex Corporation, Thermo Fisher Scientific, Inc, Danaher, F. Hoffmann-La Roche Ltd, Trivitron Healthcare, Life Technologies Corporation, Hologic, Inc and Merck KGaA.
