Abstracts

According to Statistics MRC, the Global Home Beer Brewing Machine Market is accounted for \$15.47 million in 2020 and is expected to reach \$46.02 million by 2028 growing at a CAGR of 14.6% during the forecast period. Factors such as rising popularity of customized beer and growing demand for home craft and draught beer are driving the growth of the market. However, cultural restrictions as well as conservative attitudes toward beer consumption are hampering the growth of the market.

Home beer brewing equipment are used for the small-scale production and storage of beer. These devices are available in many sizes, and they can be easily deployed. In addition to mashing, filtering, boiling, packaging, and conditioning the fermentation, the products are both reliable and energy-efficient.

Based on the size, the full size brewer segment is anticipated to expand at a rapid pace during the forecast period owing to the growing popularity of craft beer among consumers and an increasing number of small-scale and independent brewers around the globe. By geography, Asia Pacific is going to have high growth during the forecast period due to the increasing popularity of homemade beer among millennials coupled with the shifting cultural trends.

Some of the key players profiled in the Home Beer Brewing Machine Market include LG Electronics, Home Brew West, Speidel Tank-und Beh?lterbau GmbH, BREWART, PicoBrew Inc, BREWIE, Kickstarter PBC, BrewJacket LLC, MINIBREW BV , and WilliamsWarn Ltd.
