According to Statistics MRC, the Global Homogenizers Market is accounted for \$1.40 billion in 2017 and is expected to reach \$2.54 billion by 2026 growing at a CAGR of 6.8% from 2017 to 2026. Growing Demand for Ultrasonic Homogenizers, increasing Demand for Homogenizers Providing Extended Shelf Life of Food Products, demand for innovative pharmaceutical products and more importantly, the rising disposable income among the middle class population is generating a huge opportunity for retail food. However, the high cost of equipment and maintaining the ultrasonic homogenizer obstructs the growth of the global homogenizer equipment market.

Homogenizers are equipment which is used to mix two non-soluble products into uniform consistency which helps to eliminate the separation. Advancements in technology ensured integration of automation in several business process and day to day life activities on the backdrop of its effective, efficient, safer and faster application. A homogenizer is equipment used for the homogenization of various types of material to produce suspensions, emulsions, and other products. This homogenizer is equipped with homogenizing valve and compression block, which are able to process a vast variety of application and enhance the stability and characteristics of the product. In addition, this homogenizer can be tailored according to the specific purpose.

Amongst application, Food and Dairy segment accounted for considerable shares in this market. The increase is due to changing consumer lifestyle and growing consumption of packaged foods. The rising dairy industry also provides an opportunity to the market to grow further, especially in the promising regions. The Asia-Pacific held the largest market share which can be attributed to rising economy, the rapid growth in the food & beverage and dairy sectors of the Asia-Pacific region.

Some of the key players in Homogenizers market include GEA Group, SPX Corporation, Sonic Corporation, Kronos AG, Avestin Inc., Simes SA, Ekato Holding

GmbH, Microfluidics International Corporation, Alitec, FBF Italia S.R.L, Bertoli S.R.L, PHD Technology International LLC, Omni Inc, BEE International, Tetra Pak International, hielscher ultrasonics gmbh, Ats Engineering Inc, ILSHINAUTOCLAVE CO., MICCRA GmbH and NHM Ltd.
