Abstracts

According to Statistics MRC, the Global Hot Tub Chemicals for Residential Application Market is accounted for \$897.65 million in 2020 and is expected to reach \$1,711.36 million by 2028 growing at a CAGR of 8.4% during the forecast period. Some of the key factors propelling the market growth include increasing attention in sports and water leisure deeds, surging health awareness amongst the consumers with evolving lifestyles, and rising residential building activities. However, high cost related with hot tubs may restrain the market growth.

Hot tubs are used for relaxation and hydrotherapy. It is designed to be utilized by more than one person at a time. It is usually heated by electricity or natural gas. However, hot tubs can provide a suitable environment for pathogens to grow. These germs can be controlled by maintaining correct disinfectants/chemicals and water temperature levels in the hot tub. A few major hot tub chemicals used in this process are shock, calcium hardness increaser, and granular bromine. Shock plays a key role in hot tub maintenance.

By product, the sanitizers segment is anticipated to grow at a significant rate during the forecast period, as it lowers the level of micro-organisms, by important numbers to fetch hot tub to the safe-level and help in killing the bacteria and purifying the water present in the hot tub.

On the basis of geography, North America region is likely to have lucrative growth during the forecast period, owing to increasing spending capacity and better living standards of consumers, rising popularity of hot tubs among fitness-conscious people, and rapidly growing residential construction across the region.

Some of the key players in Hot Tub Chemicals for Residential Application Market include Online Pool Chemicals, Splash Perfect, Canadian Spa Company, Leisurechem, Clever Company, and Phoenix Products Co.
