## Abstracts

According to Statistics MRC, the Global Hydraulic Dosing Pump Market is accounted for \$742.60 million in 2017 and is expected to reach \$1308.88 million by 2026 growing at a CAGR of 6.5% during the forecast period. Increasing demand from the chemical industry, growing demand for potable water, high growth in developing economies and rising acceptance of these pumps for water and wastewater treatment are some key factors propelling the growth of the market. However, rising customized demand from consumers and accessibility of low-cost & inferior-quality pump products are restraining the market growth.

Hydraulic Dosing pumps are least-capacity pumps with well-regulated discharge amounts that are used to inject the difficult-to-mix liquids into mixing, pumping, or batch/tank systems and send pressured liquid flow to the pump outlet. These pumps are usually made from stainless steel, malleable, thermoplastic and feature mounting fixtures. Hydraulic Dosing pumps often have a controller that allows the liquid flow to be regulated and adjusted simply. These are powered by mechanical source energy sources to obtain pressurize fluid.

On the basis of type, the diaphragm segment is anticipated to grow at a steady rate during the forecast period due to various applications in the industrial water & wastewater treatment industry processes that need chemical dosings such as CIP, pH adjustment, filtration, RO and coagulation/flocculation. By Geography, Asia Pacific is expected to be the largest market for the market during the forecast period, followed by Europe and North America. China and India are expected to be the major markets in the region because of the rising demand from the chemical, water & wastewater treatment, and manufacturing sectors in this region.

Some of the key players in the market are IDEX Corporation, Lewa, Dover Corporation, Iwaki, Grundfos Holding, SPX Flow, Prominent, Milton Roy, Verder International, Lutz-Jesco, Seko and Tefen.

## **WHAT OUR REPORT OFFERS:**

Market share assessments for the regional and country level segments

Market share analysis of the top industry players

Strategic recommendations for the new entrants

Market forecasts for a minimum of 9 years of all the mentioned segments, sub-segments and the regional markets

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements
