Abstracts

According to Statistics MRC, the Global Industrial Catalytic Converters Market accounted for \$XX million in 2016 and is expected to reach \$XX million by 2022 growing at a CAGR of XX% from 2016 to 2022. Strict regulations set by government bodies in several countries are influencing the demand for industrial catalytic converters. On the other hand, shift towards electric vehicles by automobile industry acts as a restraint for the global industrial catalytic converters market. Increasing industrialization across the globe in industries can foster a strong potential opportunity for this market. However, volatile prices of some of the metals used in the manufacturing of industrial catalytic converters pose a major challenge for the market.

Asia Pacific is the major revenue generating region, followed by Europe and then North America. The demand for industrial catalytic converters in Asia Pacific is attributed to the constant growth of chemical and textile sectors in the region. Europe is observed as a lucrative market for the industry, due to the emerging emission standards for the reduction of carbon monoxide from various industries. Also, Europe and North America show potential opportunities for the market, as the regions are hubs for chemical manufacturing.

Some of the key players in the market include Bosal, Wuxi Weifu Lida Catalytic Converter, Teco Limited, Standard Teco, Ningbo Kesen Exhaust Gas Cleaner Manufacturing, Katcon, Dcl International Inc, Catalytic Products International and AP Exhaust Products.
