Abstracts

According to Statistics MRC, the Global Industrial CCUS Materials Market is accounted for \$10.44 billion in 2026 and is expected to reach \$36.16 billion by 2034 growing at a CAGR of 16.8% during the forecast period. Industrial CCUS Materials refer to specialized materials used in carbon capture, utilization, and storage systems to absorb, separate, transport, convert, or permanently store carbon dioxide emissions generated from industrial operations. These materials include advanced solvents, sorbents, membranes, catalysts, mineralization compounds, and adsorption media designed to improve carbon capture efficiency and reduce operational costs. They are widely applied across power generation, cement, steel, chemicals, and oil and gas industries to support decarbonization objectives and emissions compliance. Increasing global climate commitments, industrial sustainability initiatives, and investment in low-carbon technologies are driving rapid development of industrial CCUS materials worldwide.

Market Dynamics:

Driver:

Government mandates for carbon emission reduction

Governments across major economies including the European Union, United States,

and China have established legally binding net-zero emission commitments that require carbon capture, utilization, and storage as a critical tool for decarbonizing industrial sectors. Mandatory carbon pricing mechanisms, emissions trading systems, and carbon border adjustment policies create direct financial incentives for heavy industry to deploy carbon capture technology, generating substantial and growing demand for the specialized absorbents, membranes, and catalysts that form the functional core.

Restraint:

High capital investment requirements for projects

Construction and operation of commercial-scale carbon capture facilities requires enormous capital investment, including specialized material procurement, engineering of capture systems, development of CO₂ compression and transport infrastructure, and establishment of geological storage sites. These costs remain prohibitive for many industrial operators, especially in sectors with tight margins such as cement and steel. Without sustained government subsidies or carbon pricing at levels sufficient to make capture projects financially attractive, the high capital barrier continues to slow.

Opportunity:

Expanding industrial decarbonization commitments globally

Industrial sectors including steel, cement, chemicals, and power generation face mounting decarbonization pressure from regulators, investors, and customers but lack readily available alternatives to combustion-based processes. For these hard-to-abate industries, CCUS represents the most commercially viable near-term pathway to reducing emissions without restructuring production. Growing corporate net-zero commitments and expanding government funding for industrial CCUS demonstration projects are creating a broad and deepening market for advanced capture materials across diverse industrial applications globally.

Threat:

High energy penalty of current capture technologies

The dominant post-combustion carbon capture technologies based on amine solvent absorption impose a significant energy penalty on facilities where deployed, typically

reducing net energy output by a meaningful percentage. This energy cost increases operational expenses and reduces the overall climate benefit by requiring additional fuel consumption to run the capture process. The challenge of developing next-generation capture materials that deliver high selectivity and capacity at substantially lower regeneration energy requirements remains a critical technical barrier.

Covid-19 Impact:

The Industrial CCUS Materials Market experienced strategic momentum during the COVID-19 period as governments and industries reinforced long-term decarbonization commitments. Spurred by green recovery initiatives and sustainability-focused stimulus packages, investments in carbon capture infrastructure accelerated. Fueled by heightened emphasis on industrial emission control and climate resilience, research activities surrounding advanced absorbents, membranes, and catalytic materials expanded. Additionally, collaborations between energy producers and technology developers strengthened commercialization pathways, reinforcing steady market advancement in the post-pandemic landscape.

The absorbents segment is expected to be the largest during the forecast period

The absorbents segment is expected to account for the largest market share during the forecast period, due to its high carbon capture efficiency and broad applicability across industrial facilities and power generation plants. Propelled by continuous innovation in solid sorbents, amine-based solutions, and metal-organic frameworks, absorbent materials demonstrate superior CO₂ selectivity and regeneration performance. Furthermore, scalability, cost optimization advancements, and compatibility with existing capture systems strengthen their dominant adoption across large-scale CCUS installations.

The point source segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the point source segment is predicted to witness the highest growth rate, driven by increasing implementation of carbon capture technologies at concentrated emission sites such as cement plants, refineries, and thermal power stations. Spurred by stringent emission reduction targets and industrial decarbonization mandates, point source capture solutions enable measurable and immediate carbon mitigation. Additionally, integration with enhanced oil recovery and industrial utilization pathways is accelerating deployment across high-emission sectors.

Region with largest share:

During the forecast period, the North America region is expected to hold the largest market share, owing to substantial federal funding, tax incentives, and established CCUS infrastructure. Propelled by advanced research ecosystems and strong collaboration between energy companies and technology providers, the region demonstrates early commercialization of innovative capture materials. Moreover, supportive regulatory frameworks and active carbon storage projects reinforce North America's leadership in Industrial CCUS Materials deployment.

Region with highest CAGR:

Over the forecast period, the Asia Pacific region is anticipated to exhibit the highest CAGR, due to expanding industrial output and rising commitment toward carbon neutrality targets. Spurred by government-backed decarbonization programs and increasing investments in low-carbon technologies, industries across China, Japan, South Korea, and India are actively adopting CCUS solutions. Furthermore, growing public-private partnerships and infrastructure expansion are accelerating material innovation and large-scale project implementation across the region.

Key players in the market

Some of the key players in Industrial CCUS Materials Market include Exxon Mobil Corporation, Shell plc, BP plc, TotalEnergies SE, Chevron Corporation, Schlumberger Limited, Baker Hughes Company, Honeywell International Inc., Linde plc, Air Liquide, Mitsubishi Heavy Industries, Ltd., Siemens Energy AG, Aker Solutions ASA, Halliburton Company, BASF SE and Dow Inc.

Key Developments:

In February 2026, TotalEnergies outlined 2026 objectives, emphasizing relentless emissions reduction. The company reinforced CCUS deployment, focusing on materials innovation and partnerships to strengthen resilience and accelerate carbon management across industrial and power sectors.

In January 2026, Shell published its Energy Security Scenarios, highlighting CCUS as critical for balancing energy security and decarbonization. The company reinforced investment in carbon management technologies, including capture materials, to support

global climate goals.

Material Types Covered:

Absorbents

Adsorbents

Membranes

Catalysts

Sorbents

Metal-Organic Frameworks (MOFs)

Source of CO₂ Covered:

Point Source

Ambient Air

Service Models Covered:

Capture-as-a-Service

Technology Licensing

Engineering, Procurement & Construction (EPC)

Technologies Covered:

Pre-Combustion Capture

Post-Combustion Capture

Oxy-Fuel Combustion

Direct Air Capture

Applications Covered:

Power Generation

Oil & Gas

Chemical Processing

Cement

Steel

End Users Covered:

Energy Companies

Industrial Manufacturers

Oilfield Service Providers

Government Projects

Regions Covered:

North America

United States

Canada

Mexico

Europe

United Kingdom

Germany

France

Italy

Spain

Netherlands

Belgium

Sweden

Switzerland

Poland

Rest of Europe

Asia Pacific

China

Japan

India

South Korea

Australia

Indonesia

Thailand

Malaysia

Singapore

Vietnam

Rest of Asia Pacific

South America

Brazil

Argentina

Colombia

Chile

Peru

Rest of South America

Rest of the World (RoW)

Middle East

§ Saudi Arabia

§ United Arab Emirates

§ Qatar

§ Israel

§ Rest of Middle East

Africa

§ South Africa

§ Egypt

§ Morocco

§ Rest of Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2023, 2024, 2025, 2026, 2027, 2028, 2030, 2032 and 2034
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

- 1.1 Market Snapshot and Key Highlights
- 1.2 Growth Drivers, Challenges, and Opportunities
- 1.3 Competitive Landscape Overview
- 1.4 Strategic Insights and Recommendations

2 RESEARCH FRAMEWORK

- 2.1 Study Objectives and Scope
- 2.2 Stakeholder Analysis
- 2.3 Research Assumptions and Limitations
- 2.4 Research Methodology
 - 2.4.1 Data Collection (Primary and Secondary)
 - 2.4.2 Data Modeling and Estimation Techniques
 - 2.4.3 Data Validation and Triangulation
 - 2.4.4 Analytical and Forecasting Approach

3 MARKET DYNAMICS AND TREND ANALYSIS

- 3.1 Market Definition and Structure
- 3.2 Key Market Drivers
- 3.3 Market Restraints and Challenges
- 3.4 Growth Opportunities and Investment Hotspots
- 3.5 Industry Threats and Risk Assessment
- 3.6 Technology and Innovation Landscape
- 3.7 Emerging and High-Growth Markets
- 3.8 Regulatory and Policy Environment
- 3.9 Impact of COVID-19 and Recovery Outlook

4 COMPETITIVE AND STRATEGIC ASSESSMENT

- 4.1 Porter's Five Forces Analysis
 - 4.1.1 Supplier Bargaining Power
 - 4.1.2 Buyer Bargaining Power
 - 4.1.3 Threat of Substitutes
 - 4.1.4 Threat of New Entrants

- 4.1.5 Competitive Rivalry
- 4.2 Market Share Analysis of Key Players
- 4.3 Product Benchmarking and Performance Comparison

5 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY MATERIAL TYPE

- 5.1 Absorbents
- 5.2 Adsorbents
- 5.3 Membranes
- 5.4 Catalysts
- 5.5 Sorbents
- 5.6 Metal-Organic Frameworks (MOFs)

6 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY SOURCE OF CO?

- 6.1 Point Source
- 6.2 Ambient Air

7 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY SERVICE MODEL

- 7.1 Capture-as-a-Service
- 7.2 Technology Licensing
- 7.3 Engineering, Procurement & Construction (EPC)

8 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY TECHNOLOGY

- 8.1 Pre-Combustion Capture
- 8.2 Post-Combustion Capture
- 8.3 Oxy-Fuel Combustion
- 8.4 Direct Air Capture

9 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY APPLICATION

- 9.1 Power Generation
- 9.2 Oil & Gas
- 9.3 Chemical Processing
- 9.4 Cement
- 9.5 Steel

10 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY END USER

- 10.1 Energy Companies
- 10.2 Industrial Manufacturers
- 10.3 Oilfield Service Providers
- 10.4 Government Projects

11 GLOBAL INDUSTRIAL CCUS MATERIALS MARKET, BY GEOGRAPHY

- 11.1 North America
 - 11.1.1 United States
 - 11.1.2 Canada
 - 11.1.3 Mexico
- 11.2 Europe
 - 11.2.1 United Kingdom
 - 11.2.2 Germany
 - 11.2.3 France
 - 11.2.4 Italy
 - 11.2.5 Spain
 - 11.2.6 Netherlands
 - 11.2.7 Belgium
 - 11.2.8 Sweden
 - 11.2.9 Switzerland
 - 11.2.10 Poland
 - 11.2.11 Rest of Europe
- 11.3 Asia Pacific
 - 11.3.1 China
 - 11.3.2 Japan
 - 11.3.3 India
 - 11.3.4 South Korea
 - 11.3.5 Australia
 - 11.3.6 Indonesia
 - 11.3.7 Thailand
 - 11.3.8 Malaysia
 - 11.3.9 Singapore
 - 11.3.10 Vietnam
 - 11.3.11 Rest of Asia Pacific
- 11.4 South America
 - 11.4.1 Brazil

- 11.4.2 Argentina
- 11.4.3 Colombia
- 11.4.4 Chile
- 11.4.5 Peru
- 11.4.6 Rest of South America
- 11.5 Rest of the World (RoW)
 - 11.5.1 Middle East
 - 11.5.1.1 Saudi Arabia
 - 11.5.1.2 United Arab Emirates
 - 11.5.1.3 Qatar
 - 11.5.1.4 Israel
 - 11.5.1.5 Rest of Middle East
 - 11.5.2 Africa
 - 11.5.2.1 South Africa
 - 11.5.2.2 Egypt
 - 11.5.2.3 Morocco
 - 11.5.2.4 Rest of Africa

12 STRATEGIC MARKET INTELLIGENCE

- 12.1 Industry Value Network and Supply Chain Assessment
- 12.2 White-Space and Opportunity Mapping
- 12.3 Product Evolution and Market Life Cycle Analysis
- 12.4 Channel, Distributor, and Go-to-Market Assessment

13 INDUSTRY DEVELOPMENTS AND STRATEGIC INITIATIVES

- 13.1 Mergers and Acquisitions
- 13.2 Partnerships, Alliances, and Joint Ventures
- 13.3 New Product Launches and Certifications
- 13.4 Capacity Expansion and Investments
- 13.5 Other Strategic Initiatives

14 COMPANY PROFILES

- 14.1 Exxon Mobil Corporation
- 14.2 Shell plc
- 14.3 BP plc
- 14.4 TotalEnergies SE

- 14.5 Chevron Corporation
- 14.6 Schlumberger Limited
- 14.7 Baker Hughes Company
- 14.8 Honeywell International Inc.
- 14.9 Linde plc
- 14.10 Air Liquide
- 14.11 Mitsubishi Heavy Industries, Ltd.
- 14.12 Siemens Energy AG
- 14.13 Aker Solutions ASA
- 14.14 Halliburton Company
- 14.15 BASF SE
- 14.16 Dow Inc.
- 14.17 Carbon Clean Solutions Ltd.
- 14.18 Climeworks AG
