Abstracts

According to Statistics MRC, the Global Industrial Waste Management market is accounted for \$1,130.9 billion in 2017 and is expected to reach \$2,755.2 billion by 2026 growing at a CAGR of 10.4%. A scarcity of land for waste disposal and focus on energy and resource recovery is impelling the market growth. However, low sustainability in waste management and low importance towards waste management are restricting market growth. In addition, the rise in the purchase of recyclable products is providing opportunities for market growth.

Industrial waste refers to the waste produced by industrial activity which comprises of any material which is unusable throughout a manufacturing process of factories, mills, industries and mining activities. It is the process of giving solid wastes and deals with a variety of solutions for recycling items that don't fit trash. Some of the solid wastes are municipal, agricultural and special like healthcare, sewage sludge. Waste management is an assortment, shipping, and clearance of garbage, sewage, and other waste products.

Amongst Services, Incinerators are used for incineration of solid waste. Incineration is a waste treatment process that consists of combustion of organic waste materials into ash, flue gas and heat. By geography, Asia Pacific is the emergence of the region as a manufacturing hub has intensified the need for the adoption of dedicated approaches for industrial waste disposal.

Some of the key players in the Industrial Waste Management market include Clean Harbors, Inc, Calgon Carbon Corporation, Enviroserv Waste Management (Pty) Ltd, Republic Services Inc, Remondis AG & Co. Kg, Stericycle Inc, Suez Environnement Sa, Summit Equipment, Inc., Veolia Environnement, Waste Management Inc, Aeration
