Abstracts

According to Statistics MRC, the Global Injection Molding Machine Market is accounted for \$10.30 billion in 2020 and is expected to reach \$15.93 billion by 2028 growing at a CAGR of 5.6% during the forecast period. High demand from the packaging industry, growth in automotive sector fueling demand for large plastic molds and rising awareness about energy saving are driving the market growth. However, high initial and maintenance cost of machines is hampering the growth of the market.

Injection molding machines (IMM) are used in a broad range of industrial, medical, dental, aerospace, firearms, and automotive applications as it is one of the most important processes in mass production. The injection molding process is reproducible and delivers similar products at a fast rate. Furthermore, IMM can produce engineering components and small disposable consumer goods with high precision.

Based on the machine type, the all-electric segment is going to have lucrative growth during the forecast period owing to its lower use of chilled water, decreased housekeeping and preventive maintenance, less energy and oil consumption, and lower repair rate. By geography, Asia Pacific is going to have high growth during the forecast period due to the rising disposable incomes and rising standards of living in emerging economies in the region.

Some of the key players profiled in the Injection Molding Machine Market include Multiplas Engineering Co., Ltd., Mold Hotrunner Solutions Inc., Milacron Holdings Corp., KraussMaffei Group GmbH, Husky Injection Molding Systems Ltd., Huarong Plastic Machinery Co., Ltd., Haitian International Holdings Limited, Fu Chun Shin Machinery Manufacture Co., Ltd., Engel Austria GmbH, Dr. Boy GmbH & Co.
