Abstracts

According to Statistics MRC, the Global Liquid Milk Replacers Market is accounted for \$193.26 million in 2017 and is expected to reach \$331.47 million by 2026 growing at a CAGR of 6.2% during the forecast period. Increasing consumption of dairy products and acceptance of precision nutrition techniques are some factors impacting the market growth. However, factors such as preservation and logistical advantages associated with powdered milk replacers are hampering the market.

Amongst types, non medicated segment accounted for considerable market share during predicted period. This is owing to the fact that infant livestock are being fed with milk replacers for the first 6-8 weeks of their birth. Non-medicated liquid milk replacers are fed to livestock infants for the first 1-2 weeks of their birth to protect them from diseases or certain deficiencies. Based on geography, Europe is the key revenue contributor to the market during the forecast period owing to increasing demand for milk and milk products among consumers in this region.

Some of the key players in Liquid Milk Replacers market include Liprovit BV, Glanbia, PLC, Nutreco N.V., Cargill, Petag Inc., Calva Products, LLC, Land O'lakes Inc., Archer Daniels Midland Company, Lactalis Group and CHS Inc.
