## Abstracts

According to Statistics MRC, the Global Livestock Grow Lights Market is accounted for \$5.65 billion in 2017 and is expected to reach \$11.26 billion by 2026 growing at a CAGR of 8.0% during the forecast period. Some of the key factors such as increasing demand for expenditure of livestock-based products, adoption of smart livestock farming practices and rising focus on livestock growth and welfare are driving the market growth. However, Lack in Awareness in developing countries is hindering the growth of the market.

Grow lights are reproduction lights used in livestock farms for the growth and growth of livestock animals. They are necessary for the growth in farm animal's manufacture, and also influence the comfort and physiological retort of the livestock. The correct light for the livestock is very significant, as it helps in muscle gain, increases the feed eating, and enhances the milking effectiveness of the dairy cattle.

Based on Application, Poultry segment held significant market growth during forecast period due to rising expenditure of chicken and focus on the approachable growth of poultry population, which caters to the rising demand of customers and the food industry. By geography, Asia Pacific acquired the largest market share owing to increasing number of livestock farms and the rising size of existing farms are also projected to give to the large market in this region.
