Abstracts

According to Statistics MRC, the Global Longevity and Anti-Senescence Therapy Market is accounted for \$37.05 billion in 2025 and is expected to reach \$63.91 billion by 2032 growing at a CAGR of 8.1% during the forecast period. Longevity and anti-senescence therapy refers to a range of medical interventions aimed at extending lifespan and improving health during aging by targeting the biological processes associated with senescence. These therapies focus on delaying the onset of age-related diseases, enhancing cellular function, and promoting overall vitality. By addressing the underlying mechanisms of aging, such as cellular damage and inflammation, these therapies seek to improve quality of life and increase the healthy years of life.

According to the data of American Heart Association, in 2020, average person in the U.S. has a stroke every 40 seconds, accounting for one out of every 19 deaths.

Market Dynamics:

Driver:

Increased consumer awareness of anti-aging products

As global populations become more health-conscious and informed about age-related diseases and visible signs of aging, demand for effective therapies and products has surged. Social media, online health platforms, and widespread marketing have further educated consumers about innovative solutions such as senolytics, supplements, and regenerative therapies. This awareness encourages early adoption of preventive measures and lifestyle enhancements. Moreover, the growing interest in extending healthspan rather than just lifespan is fueling consumer investment in evidence-based anti-aging products, driving growth and innovation across the market.

Restraint:

High costs of advanced therapies

Cutting-edge treatments such as gene therapy, stem cell therapy, and senolytic drugs often involve complex development processes, expensive clinical trials, and specialized equipment, leading to elevated pricing. These costs make such therapies inaccessible to a large portion of the population, particularly in low- and middle-income regions. Additionally, limited insurance coverage and reimbursement options further hinder patient affordability. As a result, despite growing interest in anti-aging solutions, the high financial burden remains a barrier to widespread adoption and market expansion.

Opportunity:

Expansion of telemedicine and digital health solutions

With increasing accessibility to virtual healthcare platforms, patients can now consult specialists, access personalized anti-aging treatment plans, and monitor health metrics remotely. This digital transformation enhances the delivery of preventive care, lifestyle coaching, and chronic disease management—key components of longevity-focused therapies. Wearable devices and mobile health apps enable real-time tracking of biomarkers related to aging, encouraging proactive health management. As consumers embrace remote healthcare, telemedicine serves as a convenient, cost-effective channel for expanding the reach and impact of longevity treatments globally.

Threat:

Rapid technological changes leading to obsolescence

Companies investing heavily in current therapies may find their products outdated as

newer, more effective solutions emerge. This constant evolution demands continuous R&D spending, regulatory adaptation, and strategic agility, which can strain smaller firms and delay commercialization. Moreover, healthcare providers may hesitate to adopt therapies that could soon be surpassed, impacting market penetration. Consequently, while the rapid pace of innovation is exciting, it also brings uncertainty and intensifies competitive pressure, potentially disrupting stable market growth.

Covid-19 Impact:

The COVID-19 pandemic initially slowed the growth of the longevity and anti-senescence therapy market, as clinical trials were postponed and supply chains faced disruptions. Healthcare priorities shifted toward managing the immediate crisis, sidelining age-related treatments. Despite this setback, the pandemic underscored the need to enhance healthspan and address aging-related risks, sparking renewed attention and funding in the sector. As conditions normalized, the market began to rebound, with a stronger focus on regenerative and preventive healthcare approaches.

The senolytic drug therapy segment is expected to be the largest during the forecast period

The senolytic drug therapy segment is expected to account for the largest market share during the forecast period, driven by its potential to remove harmful senescent cells linked to aging and chronic illnesses. Increasing age-related health issues, rising interest in anti-aging treatments, and progress in AI-powered drug development are propelling growth. Innovations like small molecule senolytics and plant-based compounds are gaining traction. Significant advancements are being made through active clinical trials targeting diseases such as cardiovascular conditions and dementia, bolstered by increasing financial backing from biotechnology and pharmaceutical companies.

The hospitals & clinics segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the hospitals & clinics segment is predicted to witness the highest growth rate, driven by growing cases of chronic illness, aging demographics, and a shift toward preventive medicine. Cutting-edge technologies such as senolytics, stem cell therapy, and genetic interventions are reshaping treatment strategies. Trends like AI-driven drug development and customized aging solutions are gaining momentum. Noteworthy progress includes trials for heart and brain disorders, with rising

biotech funding and supportive regulations enhancing healthcare-led innovation.

Region with largest share:

During the forecast period, the Asia Pacific region is expected to hold the largest market share, fuelled by an aging population, a surge in chronic illnesses, and increased interest in proactive health management. Advanced technologies such as senolytics, gene editing, stem cell therapy, and mitochondrial restoration are gaining traction. Trends like AI-driven drug development, tailored aging treatments, and regenerative approaches are emerging. Major advancements include clinical research on heart and brain diseases, rising biotech funding, and favourable government initiatives promoting healthy aging innovations.

Region with highest CAGR:

Over the forecast period, the North America region is anticipated to exhibit the highest CAGR, propelled by an aging population, increasing chronic health issues, and heightened interest in preventive medicine. Cutting-edge technologies like senolytics, gene editing, stem cell applications, and mitochondrial therapies are at the forefront. Notable trends include AI-enabled drug development, customized aging interventions, and regenerative solutions. Significant progress includes expanded biotech funding, clinical studies targeting brain and heart diseases, and strong partnerships between academic institutions and pharmaceutical companies driving innovation.

Key players in the market

Some of the key players in Longevity and Anti-Senescence Therapy Market include Calico Life Sciences, Unity Biotechnology, Juvenescence Ltd., BioAge Labs, Sierra Sciences, Ois?n Biotechnologies, Bristol-Myers Squibb, Merck & Co., Inc., AgeX Therapeutics, Inc., AbbVie Inc., Altos Labs Inc., Bayer AG, CohBar, Life Biosciences, Inc., and Insilico Medicine.

Key Developments:

In July 2025, Bayer signed a development and distribution agreement with French pheromones expert company M2i Group for the exclusive distribution of pheromone gels for the Asia-Pacific as well as the Latin America region and the United States building on its successful collaboration and related product launches in Europe and Africa.

In June 2025, BioAge Labs, Inc. announced advances in its apelin receptor (APJ) agonist programs that strengthen the Company's pipeline of approaches for obesity and other indications. BioAge has entered into an option agreement with JiKang Therapeutics ("JiKang") to potentially in-license a novel APJ agonist nanobody. BioAge has also filed a provisional patent application covering internally developed, novel small molecule APJ agonists.

In January 2022, Altos Labs™ (Altos™) launched as a new biotechnology company dedicated to unraveling the deep biology of cellular rejuvenation programming. Altos' mission is to restore cell health and resilience to reverse disease, injury, and the disabilities that can occur throughout life. The company launches with a community of leading scientists, clinicians, and leaders from both academia and industry working together towards this common mission.

Therapy Types Covered:

Senolytics

Gene Therapy

Cell Therapy

Mitochondrial Therapy

Immunotherapy

Other Therapy Types

Applications Covered:

Cardiovascular Diseases

Neurodegenerative Diseases

Cancer

Musculoskeletal Disorders

Dermatology and Aesthetic Applications

Metabolic Disorders

Other Applications

End Users Covered:

Hospitals and Clinics

Research & Academic Institutes

Pharmaceutical & Biotechnology Companies

Aesthetic & Anti-Aging Centers

Other End Users

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

UK

Italy

France

Spain

Rest of Europe

Asia Pacific

Japan

China

India

Australia

New Zealand

South Korea

Rest of Asia Pacific

South America

Argentina

Brazil

Chile

Rest of South America

Middle East & Africa

Saudi Arabia

UAE

Qatar

South Africa

Rest of Middle East & Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2024, 2025, 2026, 2028, and 2032
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

2 PREFACE

- 2.1 Abstract
- 2.2 Stake Holders
- 2.3 Research Scope
- 2.4 Research Methodology
 - 2.4.1 Data Mining
 - 2.4.2 Data Analysis
 - 2.4.3 Data Validation
 - 2.4.4 Research Approach
- 2.5 Research Sources
 - 2.5.1 Primary Research Sources
 - 2.5.2 Secondary Research Sources
 - 2.5.3 Assumptions

3 MARKET TREND ANALYSIS

- 3.1 Introduction
- 3.2 Drivers
- 3.3 Restraints
- 3.4 Opportunities
- 3.5 Threats
- 3.6 Application Analysis
- 3.7 End User Analysis
- 3.8 Emerging Markets
- 3.9 Impact of Covid-19

4 PORTERS FIVE FORCE ANALYSIS

- 4.1 Bargaining power of suppliers
- 4.2 Bargaining power of buyers
- 4.3 Threat of substitutes
- 4.4 Threat of new entrants
- 4.5 Competitive rivalry

5 GLOBAL LONGEVITY AND ANTI-SENESCENCE THERAPY MARKET, BY THERAPY TYPE

- 5.1 Introduction
- 5.2 Senolytics
 - 5.2.1 Small Molecule Senolytics
 - 5.2.2 Combination Senolytic Treatments
 - 5.2.3 Natural Senolytics
- 5.3 Gene Therapy
 - 5.3.1 CRISPR-Based Gene Therapy
 - 5.3.2 Viral Vector Gene Therapy
- 5.4 Cell Therapy
 - 5.4.1 Stem Cell Therapy
 - 5.4.2 Regenerative Cell Therapy
- 5.5 Mitochondrial Therapy
- 5.6 Immunotherapy
- 5.7 Other Therapy Types

6 GLOBAL LONGEVITY AND ANTI-SENESCENCE THERAPY MARKET, BY APPLICATION

- 6.1 Introduction
- 6.2 Cardiovascular Diseases
- 6.3 Neurodegenerative Diseases
- 6.4 Cancer
- 6.5 Musculoskeletal Disorders
- 6.6 Dermatology and Aesthetic Applications
- 6.7 Metabolic Disorders
- 6.8 Other Applications

7 GLOBAL LONGEVITY AND ANTI-SENESCENCE THERAPY MARKET, BY END USERS

- 7.1 Introduction
- 7.2 Hospitals and Clinics
- 7.3 Research & Academic Institutes
- 7.4 Pharmaceutical & Biotechnology Companies
- 7.5 Aesthetic & Anti-Aging Centers
- 7.6 Other End Users

8 GLOBAL LONGEVITY AND ANTI-SENESCENCE THERAPY MARKET, BY GEOGRAPHY

8.1 Introduction

8.2 North America

8.2.1 US

8.2.2 Canada

8.2.3 Mexico

8.3 Europe

8.3.1 Germany

8.3.2 UK

8.3.3 Italy

8.3.4 France

8.3.5 Spain

8.3.6 Rest of Europe

8.4 Asia Pacific

8.4.1 Japan

8.4.2 China

8.4.3 India

8.4.4 Australia

8.4.5 New Zealand

8.4.6 South Korea

8.4.7 Rest of Asia Pacific

8.5 South America

8.5.1 Argentina

8.5.2 Brazil

8.5.3 Chile

8.5.4 Rest of South America

8.6 Middle East & Africa

8.6.1 Saudi Arabia

8.6.2 UAE

8.6.3 Qatar

8.6.4 South Africa

8.6.5 Rest of Middle East & Africa

9 KEY DEVELOPMENTS

9.1 Agreements, Partnerships, Collaborations and Joint Ventures

- 9.2 Acquisitions & Mergers
- 9.3 New Product Launch
- 9.4 Expansions
- 9.5 Other Key Strategies

10 COMPANY PROFILING

- 10.1 Calico Life Sciences
- 10.2 Unity Biotechnology
- 10.3 Juvenescence Ltd.
- 10.4 BioAge Labs
- 10.5 Sierra Sciences
- 10.6 Ois?n Biotechnologies
- 10.7 Bristol-Myers Squibb
- 10.8 Merck & Co., Inc.
- 10.9 AgeX Therapeutics, Inc.
- 10.10 AbbVie Inc.
- 10.11 Altos Labs Inc.
- 10.12 Bayer AG
- 10.13 CohBar
- 10.14 Life Biosciences, Inc.
- 10.15 Insilico Medicine
