Abstracts

According to Statistics MRC, the Global Magnesium Phosphate Market is accounted for \$1.12 billion in 2020 and is expected to reach \$1.792 billion by 2028 growing at a CAGR of 6.0% during the forecast period. Rising product consumption from various applications like fertilizers, pharmaceuticals, and food & beverage and the rising emphasis on human consumption are driving the market growth. However, an overdose of magnesium phosphate in food may cause stomach upset, respiratory issues and lethargy is restraining the market.

Magnesium phosphate is a mixture of magnesium and phosphate ions and appearing in different forms. Magnesium phosphate salts are crystalline powder, white color and odorless, chemically stable, high strength, partially dissolve in water, toughness, and unsolvable in alcohol.

Based on product, the di-magnesium phosphate segment is going to have lucrative growth during the forecast period as it is used in different bakery applications as a leavening agent to enhance the rise and fluffiness of the dough. By geography, North America is going to have high growth during the forecast period due to the increasing calcium deficiency among the old people.

Some of the key players profiled in the Magnesium Phosphate include American Elements, Anmol Chemicals Group, Celtic Chemicals, Hap Seng, Hindustan Phosphate, Innophos Holdings, Jost Chemical, Manus Aktteva Biopharma, Nexgen Chemicals, Nikunj Chemicals, Nithyasri Chemicals, Pacific Chemicals Company, Powder Pack Chem, Redox, Shanpar, Refractory Minerals Company, The Mosaic Company, and Triveni Chemicals.
